Ilham Aliyev: Oil-gas sector remains priority

September 20 to mark the 25th anniversary of the Contract of the Century

Azerbaijan's National Leader Heydar Aliyev has for the first time in the world created a modern model of the 21st century's energy security

Quarter of a century has passed since the first international agreement on exploration, development and production sharing for the Azeri and Chirag fields and the deep water portion of the Gunashli field was signed under the supervision of the National Leader of Azerbaijan Heydar Aliyev in Baku on 20 September 1994.

"AzerTelecom" LLC is the backbone internet operator connecting Azerbaijan to the Global Internet Network. The company was founded in 2008 and is the subsidiary of "Bakcell" Company, the country's first mobile operator and the fastest mobile internet provider. "AzerTelecom" pays great attention to the realization of various projects for sustainable development of the society and the ICT sector of Azerbaijan. At the moment the company is implementing the "Azerbaijan Digital HUB" program to transform Azerbaijan to the Regional Digital Center. The company is a member of such influential organizations like Caspian European Club (CEC), American Chamber of Commerce in Azerbaijan (AMCHAM) and German-Azerbaijan Chamber of Commerce (AHK Azerbaijan).

106A Heydar Allyev AVE Tel: +994 12 310 10 01 Faks: +994 12 310 82 81

www.azertelecom.az info@azertelecom.az sales@azertelecom.az

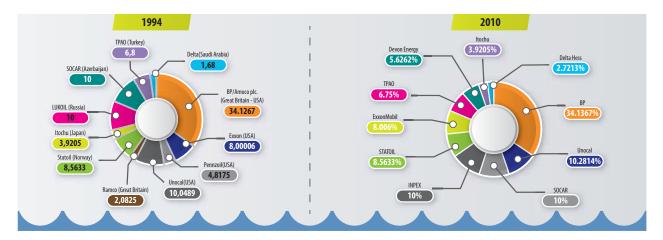

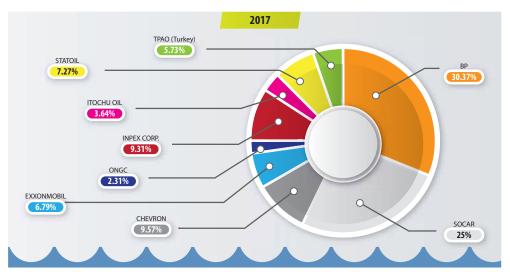

The Contract of the Century nowadays can only be compared to the "Roman law", which is today the basis of the legislation of many highly developed Western countries, it is the "economic constitution", an ode to independence, the history of which is being written in gold letters even today by a country that always has a chance for success by applying the model of the century's contract in all areas of economy, thus fully diversifying its economy.

- It is no secret that energy security issues are of big importance today. Energy security issues imply national security of countries. Imagine if the Contract of the Century had not been signed in 1994 and Azerbaijan would not have exported its rich oil-gas resources to the world markets, our economic condition could be quite different, President Ilham Aliyev says.
- In 2011 the European Union and Azerbaijan adopted a joint declaration concerning the Southern Gas Corridor.
- The Southern Gas Corridor Advisory Council meeting is annually hosted in Baku at our initiative. The 5th meeting took place in February of this year. We certainly have no doubts that we will ensure successful implementation of this giant project as there are no problems left today, both in terms of the international cooperation and in terms of financial resources, in order to get this project done.
- We can get such giant projects implemented only within the framework of the international cooperation. It is impossible to have them real-

ized without it. We managed to achieve it owing to oil and gas pipelines, making of investments, involvement of international financial institutions and of course thanks to joint efforts.

- Creation of the State Oil Fund and solution of the most important issues via this fund also turned out possible owing to our successful oil policy. The State Oil Fund financed the construction of more than 100 towns for displaced persons. Diversification of economy of Azerbaijan and making investments into infrastructure projects are also associated right with these projects. In recent years we have implemented our main infrastructure projects and the work in this direction is ongoing. Issues concerning road construction, provision of gas supply and electricity are also successfully handled in Azerbaijan. Provision of gas supply reached 95%. It would be impossible if we did not have sufficient gas resources. The major task facing the country today is to lower dependence on the oil-gas factor and develop the non-oil sector. Important measures are taken in this direction as well. In the World Bank's latest report on business environment index Azerbaijan is taking the 25th position on a global scale.
- We are successfully implementing the program on regional development. We certainly have to keep working in order to have our budget filled mainly at the expense of the non-oil sector and we are getting close to this goal. However, you have to know that the oil-gas sector will remain a priority for us, the President said.

Next step future farming

Experience progress and digitalization in dairy farming.

GEA develops systems that holistically improve the efficiency of your entire production. With our intelligent technology, you get to master all of your dairy farming business and shape the future according to your requirements.

Together we will develop a strategy tailor-made for your needs to make your dairy production more efficient and your business more profitable. GEA's networked solutions and service offerings support you and your farm every day in making targeted and reliable use of your optimization potential.

DairyRobot R9500

Uniquely efficient with free milking times.

Whether single box or multiple boxes combined as multibox system: your cows decide by themselves, when they want to be milked. DairyRobot R9500 automatically takes care of premium quality milk and an excellent teat condition. That frees up resources to make your daily planning and routines more flexible and effective. The modern, functional design, large touchscreen display and exemplary ergonomics of DairyRobot R9500 greatly simplify data monitoring, while its manual support features make it especially easy to handle special need cows. DairyRobot R9500 also allows for an individualized approach to maximize your farm's operational efficiency because this exceedingly compact milking box can be seamlessly integrated into your preferred barn design.

Optimized design, higher throughput.

Efficiency gains thanks to numerous design optimizations: the new shape of the entrance and exit doors and the reshaped end frame enable an even better positioning of all kind of cows inside the box and a completely undisturbed milking process for the cow. The feeding trough is now hydroformed, has an optimized feed supply and a very clever trough cover concept. This avoids feed losses and reduces the time that the cows stays in the box after milking. Combining all these aspects, your throughput will potentially increase by 4%!

GEA's DairyProQ rotary parlor opens groundbreaking production possibilities for milking herds of 500 cows and up. With 28-80 milking stations, approximately 120-400 cows can be automatically milked per hour, with just one operator supervising the entire process.

Staff motivation rises with their new responsibilities revolving around animal management in an attractive, state-of-the-art workplace. You'll also reap the benefits of improved operations through structured processes and fixed working times.

People, animals and technology in perfect balance.

Cows appreciate the individual attention they receive during the milking process, and the spacious, comfortable surroundings provide a sense of serene calm. The unique milking routine, from attachment through to dipping and cleaning, takes place in a fully automated process with consistent precision. Gentle milk extraction and prophylactic udder care for every animal ensure the best conditions to sustain top herd health and performance. With full visibility and easy access throughout the process, the patented automated milking stall module gives operators full confidence in safe, clean dairy production.

More than 10 years authorized dealer in Azerbaijan. 2008-2019 equipped and maintained 7 large dairy farms.

According to the new contract, the share of BP (project operator) will make 30.7%, SOCAR (25%), American companies Chevron (9.57%) and ExxonMobil (6.79%), Indian ONGC (2.31%), Japanese Corp. (9.31%) and ITOCHU Oil (3.65%), Norwegian Statoil (7.27%), *Turkish TPAO* (5.73%).

Oil production at ACG block exceeded 29 million tonnes in 2017, which is 6.8% below the figure of 2016.

Share distribution of TANAP shareholders is as follows: Southern Gas Corridor CJSC (51%), SOCAR Turkey Enerji (7%), Botas (30%), BP (12%).

For more than four decades, we have been at the forefront, innovating digital connection technologies for industrial equipment and systems. Every day, we drive efficiency, safety and productivity in utilities. Industry, transport and infrastructure plotally.

G7, G20 - facing business

'n today's era when economy coupled with its environmental constituent is frequently sacrificed for political ambitions or simply kept to the background, small and medium business interests are ignored completely. However, it is this class which is electoral, economically and socially active, and forms the basis of GDP almost in all developed economies. Churchill's wellknown "diversification, diversification and once again diversification..." statement is the very same principle which contributed into the development of Great Britain's services sector constituting 34 GDP in the island economy, as well as that of industry (18.6% of GDP) and agricultural sector ensuring 2/3 of food supply to the UK population. Today it is the 10th economy of the world in terms of the GDP at purchasing power parity for 2018.

The country is importing 6 times as much industrial goods as raw materials. The USA is the biggest exporter into the UK. 7 out of 10

leading suppliers of goods into Great Britain are the EU states. It is the latter with whom the businesses will have to establish quite new relations because of Brexit, introduce real financial control levers, starting from floating interest rates right up to creation of quite unprecedented incentives for small and medium business development, and special funds enabling to compensate possible losses of business.

"A man can die but once"

Therefore, never raised at the G20 and G7 summits was the issue of mitigating the Brexit or no-deal Brexit effects on the world economy, or this matter simply stayed out of sight of the World Media. Besides, the consequences of a possible rejection of a backstop with Northern Ireland (whereby this border will remain the only open and transparent "door" into the EU for the whole UK) require its maintaining or a clear extraor-

After the voting which took place on June 23, 2016 and ended up with the "island mentality's" victory over the "European solidarity" by a margin of just 4%, the indexes of the world stock markets were falling by an average of 5%. In particular, the decline of the FTSE index made over 500 points (down to 5808.72), while the August futures at FTSE declined down to 7%.

The impact, caused by the voting in Great Britain, led to the decline of DAX index in Europe by 6.78%. The French CAC lost 7.9% in Madrid, the Spanish market closed with a 12.68% decline, the worst decline than ever. When the markets opened, the share price of the European majors such as BP and Shell fell respectively by 5.82% and 5.77% right after the announcement of the voting results. A much sharper decline was fixed in shares of other British independent companies. Thus, the share price of Enquest, Premier Oil and the Irish Company Tullow Oil fell by 13.6%, 10.67% and 7.84% respectively.

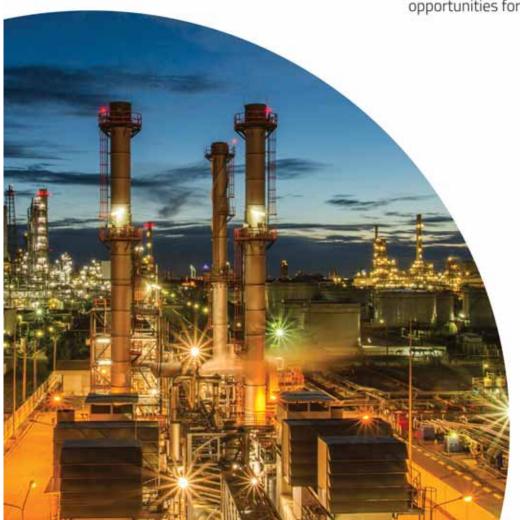

Delivering engineering and project management services to the global energy, chemicals and resources industry for over sixty years.

Worley AGT provides its customers with a wide range of consulting and advisory services, and deep technical expertise across the energy, chemicals and resources sectors.

Our integrated offerings cover full asset management services, engineering, procurement and construction capability.

We deliver these outcomes through our four business lines – Advisian, Major Projects, Integrated Solutions and Services. Currently Worley has an integrated solutions business providing EPC/EPCM services for Azerbaijan, Georgia and Turkey and with the integration of Jacobs we can draw on our global capability of over 60,000 highly competent people to further reshape markets and deliver sustained economic and social progress.

Locally, Worley is committed to a nationalization program supporting career development, expatriate succession and opportunities for graduates and interns.

dinary plan going beyond the limits of Brexit, which can cost much.

Issues of energy security, development of new spot markets and short-term deals, consolidation in the fight against climate change and development of incentives for small and medium-sized businesses, of course, require a more active stance and close attention. How assessed are the risks of the British and other oil companies which in one way or another are engaged in the upstream development projects in the Caspian Sea. The situation remains far from optimistic and the British Prime Minister Boris Johnson's decision to suspend the parliament till October 14 marks an escalation of hostile actions, Bloomberg reports. His manner of negotiation with the European leaders, characterized "by the feet on the table" rather reminds the long-forgotten "Khrushchev's boot" at the UN General Assembly in the midst of the Caribbean crisis and his famous "Pokazhem vsem Kuzkinu mat!" which meaning linguists are still trying to find out.

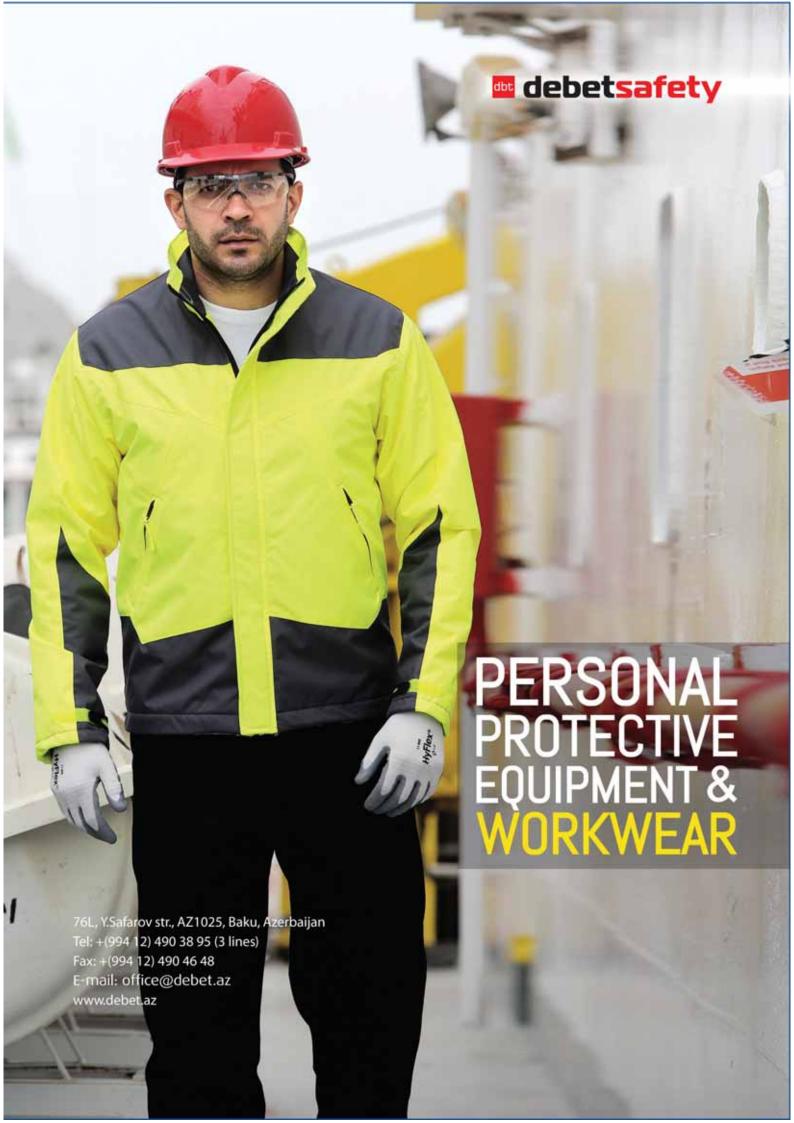

In this regard, the House of Lords of Great Britain pushes on the Premier and still leaves him an opportunity to exit the EU without a deal. The draft of the law approved by the parliamentarians, in particular, implies that the British government shall try to reach a new agreement with the EU at the European Council's meeting

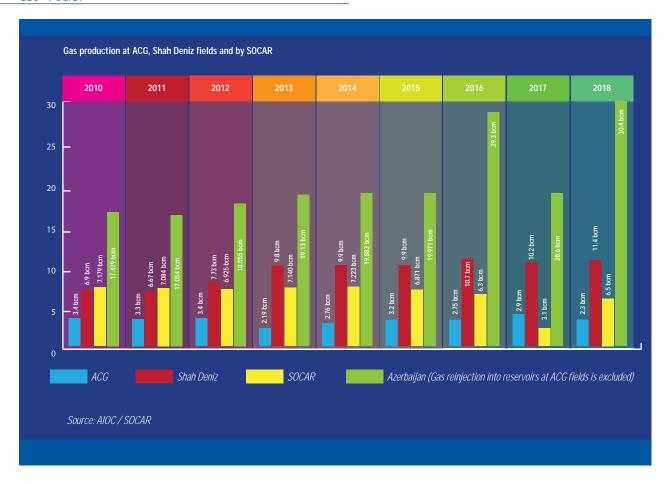

on October 18. Apart from this, till October 18 it has a right to submit a request to the parliament about possible no-deal brexiting. This item implies that tough Brexit will be possible only with the approval of legislators. If none of these conditions is fulfilled, the Prime Minister of the United Kingdom will have to request the Brussels to extend the operation of the 50th article of the Lisbon treaty till January 31, 2020.

In reality, it does not make a big difference whether it is going to be an agreed or no-deal Brexit. The factor of unpredictability, Einstein's chaos control theory, will certainly make the government to control the economy manually and in such case "a man can for sure die but once".

More so that the present Premier has repeatedly stated that he will anyway make the Brexit happen.

Apparently, the British Minister of Finance will have to prepare a solid and long-term "insurance pad" and the treasury will have to pay compensation to business for possible loss of trade preferences with the EU for a certain period. It is also conceivable that a trade war between the United States, the EU and China will help Brexit, since the territory of Ireland does not fall under the strict tariffs imposed on US goods by the EU and China, and American companies could move their headquarters to Ireland.

G-passive

Still, another meeting of the Knights of the Round Table, this time in G7 format, on August 26 in Biarritz, was constructive, attended by the US President Donald Trump. The parties managed to sign a final communiqué, reduce tension on the Iranian issues and inject hope into the solution of the Ukrainian crisis in the "Normandy Four" format. It is noteworthy that in Biarritz Donald Trump insisted on Russia's return to G-8 as soon as possible, without delay. The Italian Prime Minister Giuseppe Conte was the only one who actively supported him.

In regard to the Ukrainian problem the G7's summary statement says that "France and Germany will arrange a summit in the "Normandy format" in coming weeks in order to achieve concrete results". The meeting can also be credited with Donald Trump's statement about the American-British trade agreement – the most scalable in history – soon to be signed with the "fantastic Prime Minister" Boris Johnson. The American leader

did not attend the plenary session dedicated to the climate, stating that he had meetings with the German Chancellor Angela Merkel and the Indian Prime Minister Narendra Modi. Though, journalists found both Merkel and Modi sitting at the table of the "climate session" at that time.

Trade issues have been included into the first paragraph of the outcome document of G7. The leaders of the member states called for the reformation of the WTO. Moreover, politicians stressed the necessity of drawing up the agreement in order to have the international taxation system modernized within the framework of the Organization Economic Cooperation and Development (OECD) in 2020. "G7 adheres to open and fair world trade and stable global economy. G7 asks Finance Ministers to monitor the situation in the global economy. For this reason G7 wants to make deep changes in WTO in order to make it more effective in terms of protection of intellectual property,

The G20 participants noted that the international trade and investments are an important engine of trade, productivity, innovations, creation of new working places, and development".

"We express our support for necessary reforms to be made within the World Trade Organization to improve its work. We will maintain a constructive cooperation with other WTO members", the summit declaration says. "Besides, we admit a supplementing role of bilateral and regional free trade agreements that are consistent with the WTO. We will work over single game rules, contributing into creation of favorable business conditions", the document says.

Sizin MDB, Avropa və bütün dünyada nəqliyyat-logistika tərəfdaşınız

and to settle disagreements faster and prevent unfair practices", says the statement quoted by the press service of the Elysian palace.

"G7 is committed to reach the agreement in 2020 in order to ease regulatory barriers and modernize the international taxation in the frame of the OFCD"

G20 leaders also stated about the necessity of the WTO reformation during the Osaka meeting held June 2019.

The G20 leaders confirmed their aspiration towards free and fair trade, expressed the need for WTO reform, says the declaration passed at the end of their meeting in the Japanese city of Osaka. "We strive to achieve free, fair, undiscriminated, transparent, predictable and stable trade and conditions for investments, and to keep markets open", says the declaration.

An agreement worth \$7billion and signed between Japan and the USA has also been an achievement of the G7 meeting. It implies import of agricultural products from the USA. Perhaps, it was the only practical agreement which had become a real outcome of this summit.

As a follow-up of the summit meeting, Minister of Foreign Affairs of India Subrahmanyam Jaishankar made a statement while addressing the "Valdai" Discussion Club.

He stated: "We understand that the US influence is changing in the world today. This country used to think that it could dominate everywhere while such opportunities exist no longer now. The USA admits it itself. A large number of players, influencing the international policy and one another, is emerging", TASS reports the words of the Indian minister.

The Indian Minister of External Affairs also noted that loss of influence by one state and one civilization in the context of globalization is evident, while strengthening of the "G20' status in contrast to "G7" is an ample evidence of it: "We came to a point when G7 is replaced by G20 which is now the most important international club. The G20 format shows that understanding of the world has changed..."

Indeed, the latest G7 and G20 proceedings with almost the same agendas have shown that neither formats nor the political but rather the economic - trade and investment components are the basis of all today's globalization processes, which was mentioned marginally almost by all world leaders. As one of the meeting participants told Media, since the small and medium business, private sector, innovations and technologies are the backbone of all the economies of the developed countries today, the issue of creating such industry-specific formats for business meetings was raised in the course of the sessions. This, in turn, will promote the growth of and stimulate the world trade, while the system of taxation, standards and rules offered by business within the framework of WTO may turn out more effective and efficient by the next Summit in 2020.

We are open to cooperation

Alikhan Smailov, First Deputy Prime Minister, Minister of Finance of the Republic of Kazakhstan

Caspian Energy (CE): Mr. Smailov, Kazakhstan and Azerbaijan are actively cooperating both bilaterally and within international organizations, including in the matters of implementation of large investment and transit projects. Which projects are the most demanded today and will be relevant in the coming years?

Alikhan Smailov, First Deputy Prime Minister, Minister of Finance of the Republic of Kazakhstan: First of all, necessary attention should be focused on the transit potential of the Caspian region. Kazakhstan is a member of the Trans-Caspian International Transport Route (TITR) international association, which brings together and represents today the interests of a number of countries and companies located along the TITR, thereby reviving the route of the historical Great Silk Road. The founders of the Association are: Kazakhstan Temir Zholy JSC NC and Aktau International Sea Trade Port from the side of Kazakhstan, Azerbaijan Railways CJSC,

Azerbaijan Caspian Shipping Company and Baku International Sea Port from the side of Azerbaijan, Georgian Railway JSC and Batumi Sea Port from the side of Georgia.

As a result of the coordinated efforts of all TITR members, tariffs were reduced, constant work is currently underway to maintain a competitive level of rates, the transportation process was optimized (work on emerging issues, creating a pool, etc.). Continuous marketing work is underway to attract new goods to TITR, including export from Kazakhstan and import to Kazakhstan. A regular multimodal transport service has been established along the TITR route, and the delivery of goods by road or by sea from China, Kazakhstan and Central Asia to the ports of Batumi, Baku and Poti and then to Turkey is currently in

The interest of large transport and logistics companies

in this international corridor is increasingly growing. In particular, on June 25, 2019 Astyk-Trans JSC was admitted as an associate member of the TITR Association by decision of the general meeting in the city of Nur-Sultan. Astyk-Trans JSC specializes mainly in operating specialized rolling stock and providing freight forwarding services for grain transportation. In view of the significant growth in demand for integrated services within the framework of this multimodal service, a significant increase is expected in traffic along the TITR routes to Turkey and further to the countries of the Middle East and Southern Europe.

Further speaking of the Caspian region, one should certainly mention the oil and gas industry, namely, it is worth paying attention to the oil and gas chemical industry. The petrochemical industry is one of the most important sectors of the global economy and represents significant potential for the economy of Kazakhstan. \$1

The petrochemical industry is one of the most important sectors of the global economy and represents significant potential for the economy of Kazakhstan. \$1 invested in the petrochemical industry generates \$2.3 for the country's economy.

invested in the petrochemical industry generates \$2.3 for the country's economy (Eurostat, OECD, World Bank). The main competitive advantage of the Republic of Kazakhstan for the development of the oil-gas chemical industry is affordable hydrocarbon feedstock for production of deep limit products. At present, a draft law has been developed to put in place a mechanism for pricing commercial gas for investment projects in the oil and gas chemical industry. There are also plans to develop strong criteria for selection of investment projects, which require feedstock supply.

Large projects in the petrochemical industry are currently under implementation in the Republic of Kazakhstan. For example, a \$2.6 billion polypropylene production complex with the capacity of 500 thousand tons per year is currently under construction in the Atyrau region. The completion date is 2021. The issue of building a \$6.5 billion gas chemical complex in Atyrau region is also under consideration now. It is expected to produce 1.25 million tons of polyethylene per year.

CE: How would you evaluate the investment attractiveness of economy? Which sectors are the leading ones?

Alikhan Smailov: Though most of the foreign investment is attracted to the primary sector of Kazakhstan, the share of the manufacturing sector has been growing over the years. Already today we can state the fact that we have reached a new level in the development of attractiveness of the investment climate. We are already competing in the global market for investments in the non-primary sector. Over the years of independence large investors from the Forbes 2000 list have entered the non-oil sector of our country, including ToyotaTsusho, Danone, Vicat, Coca-Cola, Knauf, Total, Posco, Heidelberg, GE, Alstom and many others.

In general, according to the results of the IQ 2019, a number of main sectors attractive to foreign investors keep on leading in terms of the influx of foreign direct investment. They include the mining industry (60.5% or \$ 3.6 billion), the manufacturing industry (16.4% or \$ 1.0 billion), trade (9.8% or \$0.6 billion), transport (5.1% or \$0.3 billion), financial and insurance activities (2,4%, or \$0.1 billion), etc.

CE: On January 1, 2019, Kazakhstan launched the tax amnesty for small and medium-sized businesses. Could you please tell about its results? How effective is the work done?

Alikhan Smailov: Indeed, the year 2019 in Kazakhstan is featuring the tax amnesty. Since the beginning of the year, an amnesty has been carried out for small and mediumsized businesses. Under the amnesty 40,000 taxpayers have paid off their main tax debts

worth in total 7.7 billion tenge, and penalties and fines for a total of 2.4 billion tenge have been written off. It stands to mention that the tax amnesty is still ongoing and will last until the end of 2019. And, undoubtedly, the number of small and medium-sized businesses taking advantage of this opportunity will increase significantly. We believe that the amnesty will have a certain economic effect, the cancellation of accrued penalty feeds will enable entrepreneurs to increase working capital. This, in turn, will foster the business development.

CE: Could you please tell about the results of the new ASTANA-1 information system introduced by the Ministry of Finance in 2018, as well as about the Electronic Invoices System? Have the set objectives been achieved?

Alikhan Smailov: When using the previous information systems to process customs declarations, an inspector spent from 2 or more hours of working time. Now, when the online customs filing system is in place, the functionality of the listed information systems is implemented within the single ASTANA-1 system and all operations are carried out automatically by the system in less than one minute.

To date, more than 24,000 participants of foreign economic activity (ATEA) have passed registration in the Astana-1 IS, while more than 3,000 are the direct users of the system. Since the introduction of Astana-1 IS more than 1 million 471 thousand declarations have been processed in the system, of which 653,000 declarations are for import and export operations, 818,000 are declarations for the transit procedure, the share of auto production for all procedures (import, export, transit, other) is 83%.

At the same time, 491,000 declarations on import and export operations were processed automatically in less than 1 minute, the share of auto products is 75%. From January 1, 2019 to August 22, 2019, the share of auto production was 78%. According to the customs transit procedure, 724 thousand transit declarations were processed automatically in less than 1 minute, the share of auto products is 88%.

Thus, automation of the customs declaring procedure process enabled the Department of Foreign Economic Affairs to save money on temporary storage facilities, brokers, consultants, and also excluded other administrative resources that required significant expenses for paper declaration, such as printing a declaration with all previous documents, travel expenses, and physical waiting for a queue, filing, issuing a declaration, providing copies of a declaration to the owners of temporary storage facilities for a release of goods from temporary storage facilities, etc. In general, due to the

According to the results of the IQ 2019, a number of main sectors attractive to foreign investors keep on leading in terms of the influx of foreign direct investment. They include the mining industry (60.5% or \$ 3.6 billion), the manufacturing industry (16.4% or \$ 1.0 billion).

CEST LUNCH TBILISI

REGISTER NOW

www.caspianenergy.org

introduction of ASTANA-1 IS in 2018, businesses saved 77.7 billion tenge, which is a positive effect from the introduction of the online customs filing system. At the same time, due to the simplification of the customs filing procedure and saving of businesses the budget additionally received 13.5 billion tenge. The import of goods also increased (excluding imports, for which privileges for the payment of customs duties and taxes are in place) to 327 380 million tenge.

Our next objective is to create a separate "Export Control" module for goods imported from the EAEU countries to track imports and transit. Further simplification of customs procedures for participants of the foreign economic activity is planned to be achieved through the introduction of a Single Window information system for export-import operations. Uniting more than 13 information resources, including the ASTANA-1 IS, the E-Licensing Security Database, various registries and other systems, which information is necessary for customs operations, a Single Window portal creates conditions when participants of the foreign economic activity should not apply to different instances to collect certain documents and permits. The future plans envisage integration with 11 more information systems of state agen-

Through the Single Window portal foreign trade operators can receive services from more than 10 government agencies. Documents are issued by both government institutions and accredited organizations. For example, certificates of conformity will be issued by more than 90 companies that are going now to operate within a Single Window. A total of 56 documents. Most importantly, corruption will be minimized due to exclusion of the human factor in decision-making, and the transparency of customs agencies and other government institutions will increase. All this, in turn, will have a beneficial effect on a growth of economic indicators and boost an increase in competitiveness of our country on a global and regional scale.

The E-Invoicing Information System (IS ESF) was introduced in stages, as a result of which since the beginning of this year all VAT payers and taxpayers selling imported goods have become participants of the system.

The legal requirement for issuing e-VAT invoices within the IS ESF introduced in January 1, 2019 for all value added tax payers has led to an increase in the value added tax revenues. To date, about 400,000 users are registered in the E-Invoicing Information System, who issued about 280 million electronic invoices.

In general, for the first half of 2019, VAT amounted to 761.9 billion tenge, including 162.5 billion tenge gained through the large-scale introduction of e-invoices.

In addition, from April 1, 2018, the Virtual Warehouse module was put in place to ensure end-to-end traceability of the movement of goods on the basis of the E-Invoicing Information System. Now the project extends to motor vehicles, household appliances and raw sugar; and the list of goods is to be expanded. The development of e-document management in the E-Invoicing Information System is ongoing, and the opportunity has already been created to issue electronic acts of performed work and electronic contracts. Integrations under public procurement contracts are also already in place to fully switch to e-document management.

CE: How is the implementation of the Comprehensive Privatization Plan for 2016-2020 ongoing? To what extent are entrepreneurs and foreign investors interested in this process?

Alikhan Smailov: For the moment 501 objects worth 497 billion tenge in various fields of activity have been implemented and handed over to the competitive environment within the framework of the Comprehensive Privatization Plan for 2016-2020. The owners of these objects were 266 legal entities and 235 individuals (individual entrepreneurs), of which 27 were foreign individuals.

At the same time, the process of selling the largest assets of the oil and gas, energy and transport sectors and national companies themselves, which are of the greatest interest to business and investors, including foreign ones, is just beginning and will continue in 2020. Their transfer to a competitive environment will be implemented through IPO. These are such companies as Air Astana JSC, Kazakhtelecom JSC, KazMunayGas NC JSC, Kazpost JSC, Samruk-Energy JSC, and Kazakhstan Temir Zholy NC JSC. The placement of shares of these companies will be carried out by simultaneous listing on the site of the Astana International Financial Center and the London Stock Exchange (LSE).

There is already the experience of issuing shares through IPO. So, on November 14, 2018, a 15% stake in Kazatomprom NAC JSC was successfully placed (13% on the London Stock Exchange and 2% on the AIFC for the first time). The shares were acquired by 49 foreign and 16 Kazakhstan legal entities, as well as about by 2,700 citizens of the country. The total share of Kazakhstani investors amounted to 47.5% of the proposed volume of shares of Kazatomprom NAC JSC. The to-

The process of selling the largest assets of the oil and gas, energy and transport sectors and national companies themselves, which are of the greatest interest to business and investors, including foreign ones, is just beginning and will continue in 2020.

tal revenue of the raised funds amounted to 168 billion tenge, or \$451 million.

There are plans to sell 2 more largest companies in the mining industry and aviation to a strategic investor (Tau-Ken Samruk National Mining Company JSC, QAZAQ AIR JSC). Along with this, I would like to note that one of the basic principles of privatization in Kazakhstan fixed at the legislative level is publicity, competition, and legal succession. For this purpose, a unified electronic trading platform is working according to the "one window" principle for sellers and buyers to implement tenders on the web portal of the State Property Register (www.gosreestr.kz). In 2015, our trading platform was recognized as the best in the world in its category at the annual competition held by the International Telecommunication Union with the support of UNCTAD, UNESCO and UNDP.

What is being sold, at what price, when and how, bidding results, as well as full information about the objects of sale can be viewed on this web portal in the Kazakh, Russian and English languages. Information on the web portal is publicly available and updated daily. There are available mobile applications on Android and IOS, as well as the operating call center. We are open to cooperation and invite entrepreneurs, investors and foreign partners to join the privatization process in Kazakhstan.

CE: You recently said that by 2025 common markets for gas, oil and oil products will be formed within the EAEU, as well as equal access to gas, oil and oil products transportation systems of the EAEU member states. How can these plans affect Kazakhstan's cooperation with the non-EAEU countries?

Alikhan Smailov: The Program of forming the EAEU common markets of oil and of petroleum products adopted by the Decisions of the Supreme Eurasian Economic Council #23 dated December 6, 2018, and the Action Plan envisage development and adoption of a number of documents, including development of Unified Rules for Access to oil and oil products transportation systems. The Rules will be developed by the Eurasian Commission, and according to the plan, the implementation period of the Rules is 2021. According to the Program, access to oil and oil products transportation systems is the provision of the right to use oil and oil products transportation systems operated by oil and oil products transportation systems operators to transport oil and oil products within the framework of the common oil and oil products markets of the Eurasian Economic Union.

The development of the Rules will be carried out in accordance with the principles specified in Article 84 of the Treaty and Sections III and IV of the Concept. The rules will regulate transportation of oil and oil products through oil and oil products transportation

systems, including relations between operators of oil and oil products transportation systems of the Member States and participants of the common oil and oil products markets of the Union, determine principles and conditions for access to services in the field of oil and oil products transportation within the framework of the Union's common oil and oil products markets, taking into account the principle of prioritized ensuring the needs of the Member States in oil and oil products. In accordance with the Appendix #22 of the Treaty on the EAEU, the Member States are gradually forming the common gas market of the Union, as well as providing access to the services of natural monopolies in the field of gas transportation through the gas transmission systems of the Member States.

According to the provisions of the Appendix #22 of the Treaty on the EAEU, as soon as all Member States take a set of measures and sign a corresponding Protocol, the Member States shall provide access for business entities of other Member States to gas transmission systems located in the territories of the Member States by means of using their existing technical capabilities, free capacities of gas transmission systems, and taking into account the agreed indicative (forecast) balance of gas of the Union and on the basis of civil contracts of business entities. Moreover, according to Paragraph 4 of the Appendix #22 of the Treaty on the EAEU, access to the services of entities of natural monopolies in the field of gas transportation is provided only for gas originating from the territory of the Member States.

The provisions of this Protocol do not apply to relations of access to the services of entities of natural monopolies in the field of gas transportation in relation to gas originating from the territories of the third states, and to relations in the field of gas transportation from and to the Union.

CE: Could you please tell about the impact of Kazakhstan's participation in the OPEC cutback deal on the country's budget revenues and the implementation of social projects? How effective is cooperation within OPEC +?

Alikhan Smailov: The OPEC cutback deal was signed on December 10, 2016 and was extended 4 times. The last extension for 9 months was accepted on July 1, 2019. Under the latest extension the average daily oil production shall be cut by the deal parities by ~ 1.2 million barrels per day compared o the level of October 2018. The commitment of the Republic of Kazakhstan is to maintain oil production at 1.86 million barrels per day. The deal has positively affected the stabilization of the global oil market. Oil prices stabilized at about \$60 per barrel.

Thank you for the interview

Uzbekistan can become a transit hub of Central Asia

Achilbay Ramatoy, First Deputy Prime Minister, Minister of Transport of Uzbekistan

Caspian Energy (CE): Which major points will be included into the strategy for the development of the transport system of Uzbekistan for the period until 2035?

Achilbay Ramatov, First Deputy Prime Minister, Minister of Transport of Uzbekistan: The Ministry of Transport is finalizing its work over the preliminary strategy for the development of the transport system of Uzbekistan for the period until 2035, and the work over the road map on its implementation. The strategy defines key challenges in development of the transport system of the Republic and ways of their solution. The challenges are as follows: institutional, legislative, social, ecological, logistical, staffing, safety, poor quality of transport services, etc.

The following measures have been defined to address the challenges: to improve efficiency of institutes shaping and implementing a single national transport policy; to ensure quality and availability of transport services for the population; to deliver on the transport-transit potential through an advanced development of efficient transport and logistics infrastructure, active engagement in the international transport corridors; to ensure high security of transport system; to ensure environmental compatibility of transport and provide conditions for the green transport development; to increase the share of innovations in the transport system, accelerated digitalization of the transport sector, etc.

Moreover, the project of the Strategy envisages a basic and innovative approach of development of the transport system for the period until 2035.

CE: Which measures will be taken to improve the country's position in the international ratings assessing the logistics efficiency?

Achilbay Ramatov: First of all, it is important to shorten the time it takes to pass customs procedures at crossing points of the state borders of the Republic of Uzbekistan, to improve the motor road infrastructure; raise competence of national carriers in terms of quality of service provision to the population and business; improve railway and aviation infrastructure; assist business, tourism and population in getting qualitative and operational transport services; attract direct investments and financial instruments of international financial institutions and private capital to develop

the logistics industry and create modern multimodal logistics parks and industrial zones within the republic; establish constructive cooperation and exchange experience with leading foreign transport-logistics and industrial companies; deliver freights on time set by consignors.

CE: Which large infrastructure projects to be implemented soon in the transport-logistics field of Uzbekistan could you note?

Achilbay Ramatov: Noteworthy is the implementation of projects (including on public-private partnership conditions) on construction of 9 modern customs terminals at surrounding areas of the border customs posts in 2019-2021, as well as implementation of projects on construction and reconstruction of 61 bus stations and bus terminals in 2019-2021.

Among the projects is also the construction of Tashkent-Samarkand and Tashkent-Andijan toll roads, modernization of international airports in Tashkent and regions of the republic, implementation of the China-Kyrgyzstan-Uzbekistan railway construction project and the Mazari-Sharif - Gerat and Mazari-Sharif - Kabul-Peshavar railway construction projects.

CE: Which measures are taken in Uzbekistan in the field of air transport arteries in order to develop regional transport and attract tourists?

Achilbay Ramatov: At present, the leadership and the government of the Republic of Uzbekistan are taking drastic measures to improve civil aviation of the Republic of Uzbekistan, aimed at meeting citizens' needs in air transportation, ensuring high level of service to passengers in the airports and providing necessary comfortable conditions for them. Implemented were infrastructure projects on reconstruction of airports, air-strips, construction of passenger terminals which helped to bring all airports of the country to conformity with international standards of ICAO, raise the security of flights and service quality.

Passenger terminals were built at Tashkent, Bukhara, Urgench, Fergana and Navoi airports. An arrival terminal with the capacity of up to 1,200 passengers per hour was launched in the capital for international flights. The Nukus terminal is capable of receiving 400 passengers per hour. A new passenger terminal with the capacity of up to 400 passengers per hour was opened at the Termez international airport.

A number of other projects aimed at reconstruction and modernization of infrastructure at the republic's airports is planned to be implemented in the medium term.

New regular flights have been opened in terms of the extension of the geographic reach of flights. Flights to Mumbai, Vladivostok, Jidda and Jakarta have been launched. The issue of opening flights in the direction of Tbilisi, Munich and Karachi is worked on. The frequency of international flights has significantly increased. For instance, the number of one of the most in-demand Tashkent-Moscow flights reached up to 21 flights per week. Together with flights made to the capital of Russia from Samarkand, Bukhara, Urganch, Termez, Namangan and Fergona this indicator reached 49. The frequency of flights from Tashkent to Seoul, Dushanbe, Bishkek, Minsk, Rostov-on- the Don, Astana and Novossibirsk has increased as well. 14 flights from the capital and 3 flights from Samarkand are made every week to Istanbul, one of the most popular directions.

MARKETS

We deliver critical knowledge essential operational support to the upstream and downstream oil and gas industry. providing a true lifeof-field solution, from exploration and development through to production and decommissioning.

Our knowledge, expertise and resources play a vital role in the development and transportation of electric power, on land and in marine environment, furthering new

land and in marine environment, furthering new ways of meeting future energy demands. We contribute to the design, realisation, safety and integrity of construction development projects through the collection, interpretation, and application management of data relating to natural and man-made environments.

Our deep knowledge of the sea environment provides vital services and products to aid the world's merchant cruise shipping, vessels, search and rescue, fishing and other marine activities

Fugro helps companies to recover raw materials efficiently and safely, using a range of survey, mapping, investigation and sampling technologies, together with geoconsulting services

To ensure favorable conditions for an operation of additional companies in the air transportation market, including low-cost carriers (lowcosters) and companies providing services to business aviation, steps are taken to attract direct foreign investments to improve infrastructure of airports, including the use of mechanisms of the public-private partnership and cooperation with leading international companies in the field of airports management. Apart from this, the project of the concept of the Central Asian hub is being developed and aimed at step-by-step creation of the center service for transfer flows between the South-East Asian, South Asian, CIS and European points.

Taking of these measures will reduce expenditures of air companies and optimize air ticket prices for consumers, as well as increase the number of routes and flights performed in international and domestic directions, which it turn will positively contribute to the development of tourism in the Republic of Uzbekistan.

CE: What could you say about the cooperation with Azerbaijan in the field of civil aviation?

Achilbay Ramatov: The Uzbek-Azerbaijani relationship in the field of civil aviation is regulated by the agreement on air traffic and cooperation in the field of air transport reached between the governments of the Uzbekistan and Azerbaijan republics on 02.11.1996, as well as by memoranda and consultation protocols signed between aviation authorities of the two countries. Aviation authorities, as well as air companies appointed from both countries, are regularly holding bilateral consultations to develop the civil aviation cooperation between Uzbekistan and Azerbaijan. The aviation authorities of both countries held negotiations within the framework of the meeting of the joint intergovernmental commission for cooperation between the Republics of Uzbekistan and Azerbaijan. Discussed in the course of these negotiations were issues of liberalization of the air transport markets, prospects of further cooperation of the two countries in the field of civil aviation, consideration and signing of the aviation agreement projects. According to the results of negotiations, signed was a memorandum of understanding providing the appointed air companies of both countries a right to perform regular passenger flights with a frequency of 14 times per week from each side and regular limitless cargo flights in directions given in the supplement to the agreement.

Formerly appointed carriers of the two countries had a right for performing regular passenger flights with a frequency of 7 times a week.

At present, regular passenger flights from Uzbekistan are performed by "O'zbekiston Havo Yo'llari" Air Company with a frequency of 3 times a week, and the flights from Azerbaijan are performed twice a week by Azerbaijan Airlines.

CE: Which prospects do you see for Uzbekistan's participation in international transport corridors such as Baku-Tbilisi-Kars, North-South, Baku International Sea Trade Port, Baku-Tbilisi-Kars?

Achilbay Ramatov: Georgraphic location specifics of Uzbekistan will let it become one of the key transit hubs of Central Asia and source of getting long-term dividends from transit transportation within the framework of trade-economic relations of Central Asian countries with Turkey, European Union, Russia, Afghanistan and countries of the Persian Gulf. Depending on the transport corridors to be chosen by the European and Central Asian consignors, the below given corridors of TRACECA will be used: 1) rail and road routes Kyrgyzstan-Kazakhstan-Caspian Sea-Azerbaijan-Georgia-Black Sea region or Georgia-Turkey-European Union;

2) rail and road routes Kyrgyzstan - Turkmenistan - Caspian Sea - Azerbaijan - Georgia - Black Sea region or Georgia-Turkey-European Union.

Uzbekistan's getting dividends from trade operations and cargo transportation is possible in future at flexible and prompt response to transport and tariff policy of the European Union, at further expansion of economic and logistical cooperation of Kyrgyzstan, Tajikistan and Afghanistan with the European Union by means of value chains oriented at export/import via Uzbekistan.

Uzbekistan's strategic interest in regard to the North-South international transport corridor lies mainly in general growth of interest of leading Eurasian economies in use of land corridors. If the countries-participants of the above mentioned North-South ITC manage to establish a scheme of stable, quick and cheap transportation of freights, then one of the results can be the growth of the Indian business' interest in Central Asia, which in turn can yield dividends to Uzbekistan, including in terms of transit freight transportation.

If the operation quality of this corridor gets higher, another potential source of dividends can arise from the growth of interest of the South-East Asia countries and China (coastal economic centers in the East of the country) which can use the corridor as an option for redirecting a part of maritime freight transportation from the Suez channel. This in turn will be one of the reasons for the growth of South-East Asian exporters' interest in Central Asian markets, especially in Uzbekistan.

CE: In your opinion, which substantial changes shall a new project of the law on transport bring into the transport industry of the country?

Achilbay Ramatov: Today there are certain legislative acts regulating the transport. These are the Uzbekistan Republic's laws on the road transport, on railway transport, air code and many other legislative acts. But there is no single Law which would ensure optimal and balanced harmonious interaction of different types of transport.

The Ministry of Transport has started working out the draft of the law since February 2019. The draft law envisages the following important standards: regulating the development of intermodal, multimodal, mixed transportation, hub-based transportation technologies; setting of concrete requirements to transport organizations engaged in performance of mixed carriages, as well as to transport and other technical facilities used when making such types of transportation; issues of arranging mixed traffic, their basis, agreements, cost clearing, forms of single consignment vouchers (single bill of lading), responsibility, claims, etc. Moreover, the law will envisage definition of major principles of transport logistics such as: legality; focus on customer needs; security; safety; unity of procedures; equal access.

It is expected to set rules regulating transport safety, train skilled human resources for preventing terrorism in transport, organize an operation of transport facilities in emergency situations, ensure safety and environmental regulation in transport, etc. All of it will promote the creation of the legal framework ensuring real protection of national interests of Uzbekistan in the global market of transport services.

In general, adoption of the draft law on transport shall ensure harmonic development of all types of transport, mobility of population and availability of transportation services, safety and environmental friendliness of the transportation system of the republic.

Thank you for the interview

\$30 billion is planned to be attracted into the oil-gas industry of Uzbekistan

Alisher Sultanov, Advisor to the Prime Minister, Minister of Energy of Uzbekistan

Caspian Energy (CE): Mr. Sultanov, how would you assess the current level and prospects of cooperation between Uzbekistan and Azerbaijan in the energy field?

Alisher Sultanov, Advisor to the Prime Minister, Minister of Energy of Uzbekistan: Uzbekistan is cooperating with the Azerbaijani company SOCAR in two directions: in conduction of geological survey and increase of hydrocarbon production in the fields of the Republic of Uzbekistan. The cooperation on geological survey at the investment blocks of Uzbekistan was established in May 2018 with the signing of the memorandum of understanding. SOCAR together with BP studied the materials about the investment blocks.

Signed in the course of the 23rd International exhibition and conference "Oil and Gas of Uzbekistan OGU - 2019" hosted in Tashkent on May 15-17 was a three sided agreement on assessment of the exploratory potential of three investment blocks in Ustyurt region such as the Uzbek sector of the Aral Sea, Bayterek and Samsk-Kosbulak blocks. The document envisages re-processing of 2D seismic survey data, core and drilling mud analysis, geo-chemical analysis of fluid data (gas, oil, formation waters). It will help to get an exact assessment of the investment blocks' potential, including the potential of Paleozoic deposits, and facilitate further promotion of geological exploration work in Ustyurt region of the Republic.

Thorough work on analysis of materials has to be carried out, including the organization of work on legal, commercial and technical lines of cooperation. Given a wide work experience of SOCAR and BP, Uzbekneftgaz JSC expects positive results from the joint work in the field of geological exploration.

As far as the second line of cooperation is concerned, following the results of the preliminary work carried out jointly with SOCAR's subsidiary LLC "NIPI NEFTEGAZ", signed on May 16, 2019 was

an agreement on increase of production at fields of Kashkadarya region of Uzbekistan. The agreement envisages ensuring the oil production growth at fields using advanced methods and technologies from SOCAR.

CE: What work is underway within the framework of the agreement on joint development of fields, signed between SOCAR and Uzbekneftegaz?

Alisher Sultanov: The joint work with SO-CAR over examining the possibility of joint exploration and development of Uzbekistan fields is running on basis of the memorandum of mutual understanding signed on 16 May 2018. As a result of the work carried out, an agreement on increase of production at Garbiy Tashli and Sharkiy Tashli, Shimoliy Shurtan and Garmiston fields in Kashkadarya region of Uzbekistan was signed with SO-CAR's subsidiary LLC "NIPI NEFTEGAZ".

The agreement provides for ensuring oil production growth at fields by using experience and technologies from SOCAR.

At present a group of specialists of Uzbekneftegaz JSC is actively cooperating with the team of LLC "NIPI NEFTEGAZ" in order to determine the scope of works, develop financial-economic model and define terms of further cooperation between the parties.

CE: To what extent is the Southern Gas

Given a wide work experience of SOCAR and BP, Uzbekneftgaz JSC expects positive results from the joint work in the field of geological exploration.

Corridor promising for transporting natural gas from Central Asian countries, including Uzbekistan? To what degree the international transport corridors, such as Baku-Tbilisi-Kars, Baku International Sea Trade Port and others are attractive for transporting Uzbek energy resources?

Alisher Sultanov: Nowadays, transportation of Uzbek gas via the Southern Gas Corridor is not considered due to the lack of the necessary infrastructure.

CE: Uzbekistan is one of the leading gas exporters. Do you plan to diversify export mar-

Alisher Sultanov: Nowadays Uzbekistan is exporting natural gas to Russia, Kazakhstan, China, Kyrgyzstan and Tajikistan. Meanwhile, Uzbekneftegaz JSC is facing the task to increase export of value-added products - not the natural gas itself, but products obtained through its deep processing.

In this regard Uzbekneftegaz JSC is attracting leading foreign companies for joint deep processing of gas. For instance, one of the large projects is the construction of the gas-chemical cluster based on MTO technology with a deep processing of 1.6 bcm. The cluster will ensure production of over 1.1 million tonnes of polymer and chemical products per annum, demanded both in the domestic market and external markets.

Considering the implementation of deep gas processing projects, by 2025 the volume of 100% gas monetization in Uzbekistan shall increase from 1.4 up to 6.6bcm per annum. About 40% of produced chemical products will go for export.

It is noteworthy that Uzbekistan has a high transit potential for transportation of over 100bcm per annum, including 55 bcm along the north route, 50 bcm via the east route and 3.2 bcm along the south route.

CE: What are the top priorities of Uzbekistan in terms of development of the energy sector? Which areas are in need of investments and which projects can be of interest to foreign investors?

Alisher Sultanov: Concrete tasks regarding the development of the fuel-energy sector of the country have been assigned to the Ministry of Energy of Uzbekistan formed in February 2019. Among them are regulation of the energy sector, implementation of the production sharing agreements and control over their observance, drawing of the private capital into energy resource production and extraction, development of public and private partnership, improvement of the tariff policy so that to assist in forming competitive business environment, increasing and diversifying production of energy resources. The tasks also include an introduction of modern corporate management in the energy sector, including IFIs' proposals envisaging optimization of production processes. The work over the energy road map which is carried out jointly with the Asia Development Bank and other international financial institutions is about to complete and aims at increasing of generation capacities, upgrading of electricity networks, improvement of metering and control over electricity consumption. Major focus will be on introduction of renewable sources of eneray.

The development of Uzbekistan's fuel-energy complex strategy for 2020-2030 and a comprehensive program on power industry digitalization for 2019-2021, aimed at automating Enterprise Resource Planning (ERP) and Supervisory Control and Data Acquisition processes, is underway now. The important task facing the Ministry of Energy is to contribute to the comprehensive development of the country's oil and gas sector, attraction of foreign direct investments into this sector, implementation of promising projects and introduction of innovations.

The oil-gas industry has an important place in the economy of the republic. It is not only energy, but also a key raw material base for producing fuel, petroleum, oil and lubricants, polymers, organic chemical substances, nitrogen mineral fertilizers and others products required for all sectors of economy. Geological exploration is a baseline for increasing the potential of the oilgas industry. The company is actively working to increase the volume of exploration in the most promising areas with developed infrastructure in the Bukhara-Khivi, Ustyurt, Surkhandarya, Ferghana regions, using internal resources. We are also working with such companies as TOTAL (France), SOCAR (Azerbaijan), British Petroleum (Great Britain), Tatneft (Russia), Mubadala Petroleum (UAE), ONGC Videsh (India), etc., over expansion of geological exploration work on investment blocks that are poorly studied and feature a complex geological structure.

Currently, only 14% of natural gas is deeply processed in the oil and gas industry to produce products with high added value. There are all opportunities to increase this figure several times over the next 10 years. In this regard, JSC Uzbekneftegaz gives priority to implementation of petrochemical projects, which will help by 2030 to generate revenues exceeding those of gas export by 3 times, and increase the total export of the industry to \$ 5.5 billion.

CE: Could you please tell about major details of the new long-term investment program on expansion, modernization and diversification of generating capacities for the period up to

Alisher Sultanov: The development of generating capacities in such areas as thermal power plants (TPPs) and renewable energy sources (RES) with the attraction of foreign direct investments is one of the main priority issues in development of power industry in Uzbekistan. The addressing of issues on implementation of a number of investment projects on basis of the

As far as the second line of cooperation is concerned, following the results of the preliminary work carried out jointly with SOCAR's subsidiary LLC "NIPI NEFTEGAZ", signed on May 16, 2019 was an agreement on increase of production at fields of Kashkadarya region of Uzbekistan.

public-private partnership (PPP) is starting nowadays. The day of investors dedicated to the energy sector is held in Uzbekistan every Wednesday. Proposals of foreign companies are considered at such meetings. Implementation of promising projects is discussed. Prompt decisions on timely solution of existing matters are taken.

The work on implementation of large investment projects is currently underway to increase generating capacities of the energy system for the period until 2030. The projects are as follows:

1) construction of energy-efficient thermal generating capacities with a total volume of around 15 GW;

2) construction of modern combined cycle power plants with a total capacity of about 10 GW (at Syrdarya, Navoi, Talimarjan, Takhiatash, Turakurgan TPPs and others);

- 3) construction of maneuverable generating capacities based on gas reciprocating power units or aviation gas turbine plants with a total capacity of about 1.5 GW (at Syrdarya, Tasjkent TPPs, Musaberek TPP and other regions);
- 4) construction of power plants using renewable energy sources, bringing the total share of solar and wind power plants to 20%.
- 5) construction of a hydro power plant with a total capacity of 1.75 GW and a nuclear power plant with a capacity of 2.4 GW.

At the same time, by building new and modernizing existing coal power units, it is planned to diversify energy resources and increase the share of coal consumption from 6% to 19%. Apart from this, the Government of Uzbekistan has activated efforts to attract additional foreign investments so that to increase gas production by 17% by 2025.

CE: Which main priorities will underlie the new Concept of development of renewable sources of energy for the period of 2019-2023?

Alisher Sultanov: The main principles of the national policy of Uzbekistan in the field of renewable energy are to strengthen the country's energy security, diversify the fuel and energy sector in order to increase the specific share of renewable energy, save primary energy resources, improve the ecological situation and meet the growing needs of the population and economy of the country through the introduction of market mechanisms when setting tariffs for electricity generated out of renewables.

Among the priorities are also the expansion of cooperation with international companies and financial institutes for implementing renewables projects on the public-private partnership principles; training, retraining and skill improvement of national resources in this field. Laws on use of renewable sources of energy and on public-private partnership have been recently passed in Uzbekistan. These laws provide a firm legal framework to develop the renewables sector and attract private investments into the power industry sector of Uzbekistan in order to develop a market of independent power producers (IPP), mainly the generation facilities consuming renewables. Besides, the abovementioned laws define a set of mechanisms on provision of privileges and preferences both for producers of RES equipment and for producers of energy using RES. These significant steps are the result of fulfilling the Uzbekistan Republic President's orders on the green energy sector development. By 2025 the Strategy for Innovative Development of the Republic of Uzbekistan for 2019-2021 provides for an increase in the share of electricity production out of renewable and alternative energy sources at a level of at least 20% of the total generation.

Modern Uzbekistan has a significant technical potential in the renewable energy sector. Of this total, solar energy accounts for 176.8 million tonnes of oil equivalent, wind energy accounts for up to 0.4 million tonnes of oil equivalent, biomass accounts for 0.5 million tonnes of oil equivalent and hydropower industry accounts for 2.3 million tonnes of oil equivalent. The resources of rivers flowing through the territory of Uzbekistan, numerous irrigation canals and water reservoirs provide high potential for the construction of small hydropower plants.

To develop renewable sources of energy for the period of 2019-2023 it is planned to introduce innovative technologies and development projects in the field of RES; expand production and localization of RES plants; to get business entities and investors involved in creation of generation capacities based on well-proven technologies of use of solar, wind, bio-gas and geothermal energy; to cooperate and improve a legal framework in the field of the renewable energy sector development.

CE: What will be the future fate of the joint stock companies Uzbekenergo and Uzbekneftegaz after the restructuring?

Alisher Sultanov: As far as Uzbekenergo JSC is concerned, as a result of its reorganization, three structures have been created in compliance with modern methods of organization of production, transportation, distribution and sale of electricity. They are the Thermal Power Plants JSC, National Electric Networks of Uzbekistan JSC and Regional Electric Networks JSC.

Thermal Power Plants JSC is engaged in managing thermal power plants and electric power stations generating electricity and thermal energy. National Electric Networks of Uzbekistan JSC operates and develops main power transmission lines of the Republic of Uzbekistan, transportation of electricity along main power transmission lines of the Nowadays Uzbekistan is exporting natural gas to Russia, Kazakhstan, China, Kyrgyzstan and Tajikistan. Meanwhile, Uzbekneftegaz JSC is facing the task to increase export of value-added products.

e-mail:office@delta-telecom.net http://www.delta-telecom.net

Republic of Uzbekistan, as well as performs an interstate transit, export and import of electricity, and interaction with power industry systems of neighbor countries; a single supervisory control over electricity generating enterprises, including participation of private capital, as well as control over main and regional electrisity networks, functions as a single purchaser of electricity from enterprises producing electricity, as well as sells electricity to enterprises of regional electricity networks. Regional Electric Networks JSC manages enterprises of territorial electric grids distributing and selling electricity to ultimate customers.

As far as Uzbekneftegaz is concerned, a scaled restructuring of the oil-gas system is planned to be carried out now. As a result, firstly, it is planned to reduce excessive intermediate links in the management system by linking subholding companies to Uzbekneftegaz JSC, except for Uztransgaz JSC which is being withdrawn from the structure of Uzbekneftegaz JSC, and its package of shares owned by the holding will be passed to the state. Secondly, oil and gas production organizations (LLC Mubarekneftegaz, LLC Shurtanneftegaz, LLC Ustyurtgaz, LLC Gazlineftegazdobycha, JSC Andijanneft, JSC Dzharkurganneft) will be transformed into structural divisions of JSC "Uzbekneftegaz" without the formation of a legal entity in order to to establish direct interaction with the production process. Thirdly, reorganization of individual enterprises of the industry is expected in order to streamline the structure of Uzbekneftegaz JSC. Fourthly, the shares of Uzbekneftegaz JSC and organizations operating within it through the authorized capital of service and other non-core organizations are transferred to the State Assets Management Agency for their further sale into private ownership

Thus, structural transformations in the management system of Uzbekneftegaz JSC will allow optimizing excessive production costs of enterprises, reducing the cost of work, increasing the profitability and competitiveness of the industry, improving corporate governance methods based on international experience.

Amid changes in Uzbekneftegaz JSC, it is also planned to introduce a public-private partnership in the gas distribution system.

A task on attraction of foreign funds for projects throughout the whole company has been set. Uzbekneftegaz JSC attracted \$ 1.2 billion of foreign direct investment (FDI) in the first four months of 2019, which is twice more than the initial target of \$550 million.

This is largely due to the fact that JSC Uzbekneftegaz is becoming a step-by-step an increasingly open company.

The plans are to increase gas production from 60bcm of 2018 up to 63.6bcm in 2019 and bring the production up to 70 bcm by 2025.

Thank you for the interview

Выставка Caspian Oil and Gas в один год с Контрактом Века!

20 сентября этого года Азербайджан отмечает 25 лет со дня подписания «Контракта Века» - одного из важнейших по своему политическому, экономическому и стратегическому значению контрактов в истории Азербайджана после обретения независимости. Этот проект, являющийся основой нефтяной стратегии, открыл новые перспективы для будущего страны и придал мощный импульс для динамичного развития всей экономики Азербайджана. Контракт открыл путь для заключения новых контрактов, повысил уровень доверия к нашему государству, заложил фундамент беспрецедентного экономического роста Азербайджана. Двадцать пять лет очень короткий период для истории, но тем не менее, развитие нашей страны, ее позиция в международном сообществе, влияние в регионе достигли очень высокого уровня. В основе всего этого лежит нефтяная стратегия, архитектором которой стал общенациональный лидер Гейдар Алиев, а залогом эффективной реализации этой стратегии стала политика Президента Ильхама Алиева. Целенаправленная деятельность руководства Азербайджана в энергетическом секторе превратила его в региональный энергетический центр.

Именно подписание "Контракта века" заложило основу всех этих достижений. Предвестником данного знакового события стала международная выставка и конференция Caspian Oil and Gas, идейным вдохновителем которой был также Гейдар Алиев. Согласно его нефтяной стратегии, необходимо было привлечь на Каспий влиятельные мировые компании и обеспечить приток в Азербайджан крупных зарубежных инвестиций, которые способствовали бы укреплению национальной независимости страны, развитию ее экономики. И в мае 1994 года на выставке

Caspian Oil and Gas были сделаны к этому первые шаги – на одной площадке в одно время были собраны ключевые игроки нефтяной сферы, которым был продемонстрирован серьезный нефтегазовый потенциал Азербайджана, а они в свою очередь раскрыли перед Азербайджаном весь спектр своих инвестиционных предложений. Вполне возможно, что заключительные этапы переговоров будущих партнеров по "Контракту века" состоялись именно на выставке.

Уже прошло четверть века, а выставка и конференция Caspian Oil and Gas продолжает оставаться эффективной площадкой для презентации богатого нефтегазового и транзитного потенциала Азербайджана, его привлекательности для зарубежных инвесторов, инноваций в мировой энергетике и местом встречи ведущих профессионалов отрасли, где подписываются ключевые соглашения и контракты о дальнейшем сотрудничестве. Ежегодное участие в церемонии открытия Президента Азербайджанской Республики Ильхама Алиева в очередной раз подтверждает высокий статус выставки. За долгие годы успеха на выставку свои приветственные письма отправили президенты США, премьер-министры Великобритании, Турции и других стран. Участники выставки и конференции Caspian Oil and Gas, многие из которых с нами со дня подписания Контракта Века, знают, что каждый год, примерно в то же время, в том же месте они увидят старых друзей и партнеров, сверят часы, обсудят насущные темы отрасли, установят новые контакты.

Напрямую с "Контрактом века" связан и профессиональный праздник нефтяников страны. Но не только с датой, но и с тем, что именно контракт способствовал восстановлению престижа профессии нефтяника. Добыча нефти – это нелегкий, ответственный и почетный труд сотен тысяч людей различных специальностей. Этот торжественный день 20 сентября замечательный повод поздравить тысячи нефтяников Азербайджана, трудящихся на благо отрасли. От имени организационного комитета выставки и конференции Caspian Oil and Gas и от себя лично сердечно поздравляю вас, дорогие нефтяники, с профессиональным праздником и с юбилеем Контракта Века! Вы своим трудом прокладывали путь новой нефтяной эре Азербайджана. Желаем вам здоровья, счастья и благополучия! Особенно хочу поздравить с этой знаменательной датой Министерство Энергетики Азербайджанской Республики, а также руководство и коллектив компании SOCAR! Мы искренне благодарим вас за труд и желаем реализации всех намеченных планов, новых производственных высот во благо и процветание Азербайджана! До новых встреч на выставке и конференции Caspian Oil and Gas 2020.

CASPIAN CLUB

ORGANIZER

SPONSOR

PARTNERS

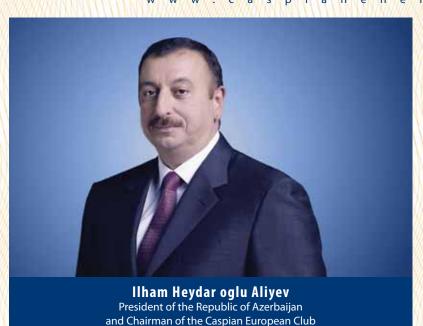

AWARD WINNER

The Caspian European Club is the largest and dynamically developing regional organization that brings together over 5,000 member companies and organizations from 70 countries around the world operating (or having intentions to work) in the Caspian, Black Sea and Baltic regions.

The Caspian European Club was established in June 2002 through an active involvement of Caspian Energy International Media Group and under support of the largest oil & gas companies operating in the Caspian-Black Sea and Baltic regions.

The Caspian American Club (established on 24 December 2016) and Caspian Asian Club (26 January 2018) will be managed by the members of the Caspian European Club for 2 years. All companies entering the Caspian European Club get an automatic membership within the Caspian American Club, Caspian Asian Club and vice-versa.

His Excellency Ilham Aliyev, President of the Republic of Azerbaijan, has been a Chairman of the Caspian European Club and Caspian Asian Club since their foundation.

The official name is the Caspian European Club. Along with the official name it is also called Caspian Business Club, Caspian Energy Club and CEIBC (abbreviated form).

Official website of the Caspian European Club – www.caspianenergy.org

Caspian Energy Jurnalı LLC has been announced a managing company to arrange the activity of the Club. The Caspian European Club is headquartered in Baku, the only littoral capital in the Caspian Sea region.

Primary objectives of the Caspian European Club:

- -To attract oil revenues from the oil industry into the development of the non-oil sector;
- To create conditions on the informational level to work out a common programme on such matters as economy, power industry, customs, taxes, environmental protection, etc.;
- To study systematically problems and proposals of foreign and local business representatives and convey this information to the Administration of the President, Government, Parliament and government entities bearing responsibility for the economic bloc;
 - To implement programs and proposals promoting creation of favorable investment and business climate;
- To implement various information projects of regional significance;
- To maintain the dialogue between the government institutions and the private sector within the framework of business forums, round tables and working groups;
 - To support and develop small and medium businesses on the informational level;
 - To support and promote ecological projects as well as alternative energy projects on the informational level;
 - To support projects on development and introduction of information technologies and telecommunications on the informational level;
- To lobby and promote companies of the Caspian-Black Sea region in the European countries and companies of Europe in the Caspian-Black Sea region on the informational level.

WORKING COMMITTEES OPERATING WITHIN THE CASPIAN EUROPEAN CLUB

- AGROINDUSTRY COMMITTEE
- BANKING & FINANCE COMMITTEE
- EDUCATION COMMITTEE
- ENERGY COMMITTEE
- ICT COMMITTEE
- INDUSTRY & CONSTRUCTION COMMITTEE

- INSURANCE COMMITTEE
- LEGAL COMMITTEE
- MEDICAL COMMITTEE
- SME (SMALL & MEDIUM ENTREPRENEURS) COMMITTEE
- TOURISM COMMITTEE
- TRANSPORT COMMITTEE

The Caspian European Club members are divided into honourary, platinum, golden, silver and bronze members.

The Caspian European Club is holding the following events in the Caspian-Black Sea and Baltic region countries on an annual basis:

- International Caspian Energy Forum, Caspian American Forum, Caspian European Forum and Caspian Asian Forum (www.CaspianEnergyForum.com),

- Hosting awarding ceremonies to present international prizes Caspian Energy Award and Caspian Business Award (www.CaspianEnergyAward.com), Caspian CEO Award (www.Award.CEO), Caspian Brand Award(www.BrandAward.org), Luxury Brand Award (www.Luxury-BrandAward.org), Caspian Media Award (www.award.az).

Caspian Energy International Media Group (www.caspianenergy.net) is operating with the support from the Caspian European Club. Distributed in 70 countries of the world, the Caspian Energy journal (www.caspianenergy.media) is a flagship of Caspian Energy International Media Group.

Besides, an online newspaper Caspian Energy News (www.caspianenergy.net), an oil-gas encyclopedia Caspian Energy History (www.oil-gas.az), an internet--catalogue CASPIAN ENERGY INFO (www.caspianenergy.info), a recruitment agency CASPIAN ENERGY JOBS, an internet-television CASPIAN ENERGY TV(www.caspianenergy.tv), CASPIAN ENERGY SPORT (www.caspianenergy.sport) agency, a research group Caspian Energy Marketing (www.caspianenergy.marketing) and others are currently in operation.

"Azerbaijan Airlines" (AZAL)

About the company: "Azerbaijan Airlines" (AZAL) is a major air carrier and one of the leaders of the aviation community of the CIS countries. Total route network of the airline is 40 destinations in 25 countries. "Azerbaijan Airlines" transported more than 2,3 million people in 2018.

Azerbaijani civil aviation fully meets the standards of the International Civil Aviation Organization (ICAO), and AZAL is a member of the most prestigious civil aviation association - the International Air Transport Association (IATA). Azerbaijan's national air carrier is a member of the Board of the Azerbaijan Tourism Association (AZTA).

AZAL received a prestigious "4 Stars" from the leader in air transport research, world-famous British consulting company Skytrax and once again confirmed it July 2018.

AZAL has one of the youngest airplane fleet that consists of 17 aircraft.

AZAL headquarters is in Baku, at Heydar Aliyev International Airport that meets international standards (it was awarded "4 Stars").

In May 2018 Heydar Aliyev International Airport was awarded the maximum "5 Stars" of prestigious Skytrax World Airport Awards. Baku Heydar Aliyev Airport is also named the best airport among airports of Russia and CIS countries for the level of the provided services.

«Азербайджанские Авиалинии» (AZAL)

О компании: «Азербайджанские Авиалинии» (AZAL) – крупный авиаперевозчик и один из лидеров авиационного сообщества стран СНГ. Совокупная маршрутная сеть авиакомпании насчитывает около 40 пунктов в 25 странах. В 2018 году «Азербайджанские Авиалинии» перевезли более 2,3 миллионов пассажиров.

Самолеты гражданской авиации Азербайджана полностью соответствуют стандартам Международной организации гражданской авиации (ICAO), а AZAL является членом самого престижного объединения гражданской авиации - Международной ассоциации воздушного транспорта (IATA). Национальный авиаперевозчик Азербайджана входит в состав членов правления Ассоциации туризма Азербайджана (AZTA).

Наиболее влиятельная в сфере оценки качества сервиса авиакомпаний британская консалтинговая организация Skytrax присвоила AZAL престижный рейтинг «4 Звезды», который она в последний раз подтвердила в июле 2018 года.

AZAL обладает одним из самых молодых самолетных парков, который насчитывает 17 воздушных судов.

Штаб-квартира AZAL расположена в Баку, в Международном аэропорту Гейдар Алиев, который отвечает требованиям международных стандартов. В мае 2018 года Международный аэропорт Гейдар Алиев удостоен максимальной награды от Skytrax World Airport Awards – «5 звезд». Бакинский аэропорт также возглавил список самых лучших по уровню предоставляемых услуг среди всех аэропортов России и стран СНГ.

Baku International Sea Trade Port CJSC

About the company: The Port of Baku is the oldest and biggest port of the Caspian Sea. For centuries the Port served as a junction between East and West, North and South, connecting dozens of nations, merchants, scientists and travelers. There are many historical references to the Port. In 1564, Sah Tahmasib of Safavids dynasty appointed Seykh Zahid a first Minister of the Port. In 1703, over 20 Indian caravans traveled along the route from Ardebil to Baku, exporting silk, oil, fish, fur, copper, horses, natural colorants, caviar and leather goods.

At present about 85% of cargo is a transit while 15 % flow directly into Azerbaijan. The given percentage ration will change after the launch of Free Trade Zone (FTZ), which is going to be similar to the Jabel Ali free trade zone in UAE. President of the Republic of Azerbaijan H.E. Ilham Aliyev's decree about measures on creation of the special economic zone like free trade zone in Alat settlement of Garadagh district of Baku, including an area of the new International Baku Sea Trade Port, was signed on March 17, 2016. The zone will transform Alat into the main logistics center, as well as a hub for distribution, manufacturing and other value added services aiming at the markets of China, Turkey, Iran, Russia, India, Pakistan and others.

In 2016, the volume of cargo transportation in the Baku International Sea Trade Port increased by 47%.

ЗАО "Баку Международный Морской Торговый Порт»

О компании: Порт Баку является самым старым и крупнейшим портом Каспийского моря. Веками порт Баку служил связующим звеном между Востоком и Западом, Севером и Югом, соединяя десятки стран, торговцев, ученых и путешественников. Имеется множество исторических справок о порте. В 1564г. Шах Тахмасиб из династии Сефевидов назначил шейха Захида первым министром порта. В 1703г. более 20 индийских караванов путешествовали вдоль маршрута из Ардебиля в Баку и экспортировали шелк, масло, рыбу, меха, медь, лошадей, натуральные красители, икру и кожаные изделия.

В настоящее время около 85% грузов являются транзитными, а 15% поступают непосредственно в Азербайджан. Данное процентное соотношение изменится с началом работы 3СТ, которую предусмотрено претворить в жизнь наподобие Свободной Зоны Джебел Али в ОАЭ. Распоряжение Президента Азербайджана Ильхама Алиева о мерах по созданию в поселке Алят Гарадагского района Баку специальной экономической зоны типа зоны свободной торговли, включая территорию нового Бакинского международного морского торгового порта, было подписано 17 марта 2016 г. С такой зоной Алят превратится в главный логистический центр, а также в центр для распределения, производства и других дополнительных услуг, ориентированных на рынки Китая, Турции, Ирана, России, Индии, Пакистана и других стран.

В 2016 году объем грузоперевозок в Бакинском международном морском торговом порту увеличился на 47%.

On 1 to 4 October, the ExpoForum Exhibition and Convention Centre is going to host the 9th St. Petersburg International Gas Forum, one of the largest specialised convention and exhibition events in the oil and gas industry.

The central event of the Forum will be its Plenary Session "Strategic Priorities of International Energy Cooperation". Representatives of the Government of the Russian Federation, top managers of the largest international and Russian corporations, world experts, heads of specialised universities and innovation centres are invited to participate in the Forum's programe.

The convention programe will be complemented by an extensive exhibition that will bring together leading industry projects. Gazprom PJSC, Uniper SE, OMV AG, Wintershall Dea GmbH, Comita Group of Companies, Royal Boskalis Westminster N.V., HMS Group, TMK PJSC, Zagorsk Pipe Plant JSC, Gazprom LNG Technologies, Almaz-Antey Air and Space Defence Corporation, ChelPipe Group, Gazprom Bureniye LLC, Gazprom Gas-Engine Fuel LLC, OMK JSC, Severstal PJSC and others have already confirmed their participation.

The Forum will be held with the participation of the Ministry of Energy of Russia, the Ministry of Industry and Trade of Russia, the Ministry of Energy of Russia, the Government of St. Petersburg, Russian Export Center JSC, the Association of European Businesses, the European Union of the Gas Industry, NGV Italy, the Russian Gas Society.

The collective stand of the Russian Export Center (REC) will display solutions of domestic manufac-

turers. The Centre is a "uniform portal" enabling partnership with export-oriented companies in the field of financial and non-financial support. The collective stand is going to bring together Russian companies with core businesses in production of electrochemical corrosion protection equipment for oil and gas pipelines, analytical lab equipment; development of computer software for the oil and gas sector. This collaborative exposition will allow the Forum participants to see the latest products of companies such as Fidesys, Permsnabsbyt, Meta-Chrom, Agro.

With the support of the REC, 20 exhibiting companies are going to organise displays at their individual stands, including CONSTANTA-2 LLC, IPC, SEALUR, NASOSY PPD, NTE, AMIRA, REGULATOR, TURBULENTNOST-DON Group of

Companies, INTRATOOL Group of KOSMOS-NEFT-GAZ, Companies, Research and Production Enterprise GAZSERVISKOMPOZIT, Research and Production Enterprise TECH-NOPROEKT, REVALVE ("PKTBA"), Prosoft Systems, OMK, HYDRO-MASHSERVICE, ChelPipe Group, Salavat Catalyst Plant. Of particular interest is the product portfolio of the legendary Russian cars "Ural" and "Lada" from manufacturers of AZ "URAL" and "ATS - service", which will present the latest in the modern automobile industry of their own production.

Every year, SPIGF confirms its high status, acting as an authoritative and sought-after international platform for discussing current issues in the gas industry. In 2018, the event was attended by 16,500 people, including 5,000 delegates from 51 countries.

CAHAN Holding

About the company: CAHAN Holding has a special place among successfully developing companies established in the fertile ground for socio-economic development strategy, foundation of which was laid by National Leader Heydar Aliyev, the founder of the modern statehood of Azerbaijan, and which is currently being successfully continued by the President of the Republic of Azerbaijan Mr. Ilham Aliyev. CAHAN Holding is a giant corporation incorporating 22 core and several subsidiary companies operating in the fields of construction, industry, service and trade, as well as representing many famous global brands in our country. Today, there are wide horizons in front of our company with representative offices not only in Azerbaijan, but also in Turkey, Russia, UAE, Switzerland and China. We are confident that with the potential we have, we can sign up to more beneficial projects for our country, expand scope of our business and become one of the world's numbered companies.

CAHAN Holding has a number of such companies as CAHAN Construction, OJSC Cahan Industrial Complex, Cahan Tea, Cahan Pen, Cahan Motors (OPEL's representative office), Cahan Tobacco International LLC - center for tobacco growing and production of tobacco products (trademarks - WANT, KENO, FINE, VISORE), Cahan RED-2 (importer of energy drink RED BULL), as well as DAYS HOTEL (WYNDHAM hotels and resorts).

CAHAN Holding

О компании: CAHAN Holding занимает особое место среди компаний, возникших на почве благоприятной стратегии социально-экономического развития, основы которой были заложены основоположником современной азербайджанской государственности, общенациональным лидером Гейдаром Алиевым и которая в настоящее время успешно продолжается Президентом Азербайджанской Республики господином Ильхамом Алиевым, CAHAN Holding занимает особое место. CAHAN Holding — это гигантское образование, объединяющее 22 основные и несколько дочерних компаний, функционирующих в области строительства, промышленности, сервиса и торговли, а также официально представляющее в стране многие известные мировые бренды. Сегодня перед нашей компанией, имеющей представительства не только в Азербайджане, но и в Турции, России, ОАЭ, Швейцарии и Китае, открываются широкие горизонты. Мы убеждены, что имеющимся у нас потенциалом, мы можем инициировать еще более выгодные проекты для нашей страны, расширить круг нашей деятельности и войти в ряд известных компаний мира.

В состав CAHAN Holding входят ряд таких компаний, как "CAHAN İnşaat" (строительная компания), ОАО "Cahan Sənaye Kompleksi" (промышленный комплекс), ООО "Cahan çay" (чайная фабрика), "CAHANPEN" (производство ПВХ строительных материалов), "Cahan Motors" (представительство OPEL), Центр по разведению табакаводства и производства табачных продукций ООО "Cahan Tabak International" (торговые марки WANT, KENO, FINE, VISORE), Cahan RED-2 (импортер эергитического напитка RED BULL). Также гостиница DAYS HOTEL (WYNDHAM hotels and resorts).

Azerbaijan Caspian Shipping Closed Joint-Stock Company

About the company: Azerbaijan Caspian Shipping Company (ACSC) is the largest shipping company in the Caspian Sea, with the history lasting for 160 years. The ACSC is operating 254 vessels and employing about 9,000 people. The Company consists of a transportation fleet, offshore support fleet, two shippards, Training Center and Azerbaijan State Marine Academy.

The merchant fleet consists of 50 vessels, including 20 tankers, 13 ferries, 14 universal dry-cargo, 2 Ro-Ro ships as well as 1 auxiliary vessel.

The CJSC's offshore fleet performs operations on full provision of offshore services covering oil-gas production in the Caspian Sea. The offshore fleet is comprised of 204 vessels, including 22 crane, 22 crane vessels, 18 supply and tug vessels, 25 passenger ships, 2 pipelay barges, 6 firefighting vessels, 5 geological survey vessels, 10 diving support vessels, and 116 other support vessels.

Currently, 11 general cargo vessels of Azerbaijan Caspian Shipping Company operate in the Black, Azov and Mediterranean Seas.

Azerbaijan Caspian Shipping Company plays a significant role in the international transportations along the Trans-Caspian Transportation route.

The shipyards of ACSC provide a wide range of professional ship repair, refurbishment and marine engineering services.

The human resources policy is one of the priority directions of development of Azerbaijan Caspian Shipping Company. Azerbaijan State Marine Academy and Training Center for seafarers, recognized by the International Maritime Organizations, are engaged in education and training of high-skilled specialists. These educational institutions also train specialists for foreign companies, engaged in maritime transport.

ЗАО «Азербайджанское Каспийское Морское Пароходство»

О компании: Азербайджанское Каспийское Морское Пароходство (АКМП) - крупнейшая судоходная компания на Каспии со 160-летней историей. АКМП оперирует 254 судами, численность работников составляет около 9 тысяч человек. В состав Пароходства входят транспортный флот, специализированный флот, два судоремонтных завода, Центр Подготовки Моряков и Азербайджанская Государственная Морская Акалемия.

Транспортный флот состоит из 51 судов, в том числе, 20 танкеров, 13 паромов, 15 универсальных сухогрузов, 2 судов типа Ro-Ro, а также 1 технического судна.

Специализированный флот АКМП выполняет работы по полному обеспечению оффшорных услуг, охватывающих процессы добычи нефти и газа на Каспийском море. В состав специализированного флота входят 204 судна, в том числе 22 крановых, 18 буксирно-снабженческих, 25 пассажирских, 2 трубоукладывающих, 6 пожарных, 5 инженерно-геологических, 10 водолазных и 116 служебных и вспомогательных судов.

В настоящее время 11 сухогрузных судов Пароходства работают в Черном, Азовском и Средиземном морях.

Азербайджанское Каспийское Морское Пароходство играет значительную роль в качестве одного из связующих звеньев в международных перевозках по Транскаспийскому международному транспортному маршруту.

Два судоремонтных завода компании предоставляют широкий спектр судоремонтных услуг сторонним организациям.

Кадровая политика одна из приоритетных направлений развития АКМП. Подготовкой специалистов занимаются Азербайджанская Государственная Морская Академия и Центр Подготовки Моряков, признанные Международной Морской Организацией. Эти учебные заведения готовят специалистов также для других компаний, связанных с морским транспортом, в том числе и зарубежных.

PASHA Bank OJSC

About the company: PASHA Bank is one of Azerbaijan's leading corporate banks. Established in 2007, we offer all major financial services, including investment banking, trade financing and asset management to a range of clients, from large corporates to small and medium enterprises. The Bank works particularly closely with companies operating in the non-oil sectors of the economy, including agriculture, transportation, construction and retail, which are vital for helping Azerbaijan to diversify its economy. Today, PASHA Bank is an international team of about 430 people representing 8 nationalities and members of our team speak a total of 14 languages. As one of Azerbaijan's youngest but largest banks, we constantly keep abreast of financial and technological innovations. We work hard to keep ahead of market trends and adopt international experience and state-of-the-art technology to ensure that we provide the best possible service to our customers.

Azerishig OJSC

About the company: Bakielektrikshebeke OJSC was transformed into Azerishig OJSC in accordance with the order of President of the Republic of Azerbaijan Ilham Aliyev, dated February 10, 2015. Purchasing electricity in the Republic of Azerbaijan, Azerishig OJSC is supplying electricity to consumers in reliable, safe and efficient manner, applying new technologies in this area, upgrading a material-technical base, using it efficiently, as well as doing other work aimed at development of this area.

40 units of 110kV substations and a circular supply scheme have been built since 2006. It played an important role in ensuring regular, sustainable and high quality power supply. Over 141 units of 35 kV substations have been built so far. Since 2006, an installed capacity of the power grid has been increased three times, while technical losses have been reduced down to 9.9%. A modern distribution control room was built. Azerishig OJSC carries out reconstruction of all its administrative buildings, attaches special importance to introduction of information-communication technologies. Prior to 2006, the power supply had not met the requirements coming from the rapid social-economic development of the country, while now this balance improved as additional technical and power capacities ensuring perspective development of the country were created. In general, complex measures taken in the energy management of the country indicate that it is the human factor lying in the basis of the development pattern of Azerbaijan and the state building philosophy.

There is a call center #199 operating within Azerishig OJSC's system. Consumers can receive answers to all questions they are interested in 24 hours a day and witness operative solution of technical issues concerning power supply.

Wind farms in Yeni Yasma and Shurabad settlements were passed to Azerishig OJSC in order to increase the efficiency of the wind energy use, as well as to carry out full testing of electric network of the wind power plants. This can be a start of the new stage for the OJSC.

Address: 13 Bakikhanov Street, Baku, AZ1065, Azerbaijan

ОАО «Азеришыг»

О компании: Распоряжением Президента Азербайджанской Республики Ильхама Алиева от 10 февраля 2015 года, открытое акционерное общество «Бакыэлектрикшебеке» преобразовано в Открытое акционерное общество «Азеришыг». ОАО «Азеришыг», закупая электроэнергию на территории Азербайджанской Республики, в надежной, безопасной и эффективной форме осуществляет снабжение потребителей электроэнергией, выполняет применение новых технологий в данной области, модернизацию материально-технической базы и ее эффективное использование, а также другие работы, связанные с развитием данной области.

С 2006 года были сооружены сорок 110-киловольтных подстанций и схема кольцевого снабжения. Это сыграло важную роль в бесперебойном, устойчивом и качественном энергоснабжении. К настоящему времени сооружено свыше сто сорок одной новых 35-киловольтных подстанций. С 2006 года установленная мощность сети увеличилась в три раза, а технические потери сократились до 9,9%. Создан современный Диспетчерский центр. ОАО «Азеришыг» реконструирует все находящиеся на его балансе административные здания, уделяет особое внимание внедрению информационно-коммуникационных технологий. Если до 2006 года организация энергоснабжения серьезно отставала от потребностей, диктуемых стремительным социально-экономическим развитием страны, то сейчас этот баланс изменился в позитивную сторону, созданы дополнительные технические и силовые возможности, соответствующие перспективному развитию страны. В целом, комплексные меры, осуществленные в энергохозяйстве страны являются реальными показателями того, что в основе модели развития Азербайджана и философии государственного строительства находится человеческий фактор.

В системе ОАО «Азеришыг» функционирует «Центр обработки звонков 199», с помощью которого потребители в течение 24-х часов в сутки получают ответы на все интересующие их вопросы, являются свидетелями оперативного решения технических вопросов, связанных с энергоснабжением.

Парки ветроэнергетики в поселениях «Ени Ясма» и «Шурабад» были переданы Открытому акционерному обществу «Азеришыг» (ОАО) с целью повышения эффективности использования ветровой энергии, а также для полного тестирования электрической сети ветряных электростанций, что может стать началом нового этапа для акционерного общества.

AGA GROUP OF COMPANIES

О компании: Основанная в 1994 году, AGA Group состоит из нескольких независимых компаний. Первенцем компании является «Caspian İnvestment Company». В 1996 году компания построила и в 1998 году ввела в строй своё первое здание «Caspian Business Center» с целевым назначением по предоставлению офисных помещений и других сопутствующих услуг. Компания является одним из пионеров основания Бизнес-центров в Азербайджане. АGA Group начала расширять свою деятельность посредством строительства новых зданий и расширения предоставляемых услуг. С этой целью в 2000-2013 годах были введены в строй здания «Silk Way Business Center», «Old Caspian Business Center», комплекс «Caspian Plaza» (состоящий из 3-х блоков), «AGA Center» и "Demirchi Tower". Дальнейшее направление своей деятельности компания видит в усовершенствовании предоставляемых услуг компаниям и создания для них комфортных условий.

SOCAR Azerigaz PU

ПО «Азеригаз» ГНКАР

General Director: Akbar Hajiyev

Генеральный директор: **Акбер Гаджиев**

About the company: Azerigaz PU was established on the basis of Azerigaz CJSC within the State Oil Company of Azerbaijan in accordance with Azerbaijan President's order dated July 1, 2009.

The production association, operating in Azerbaijan, is engaged in reception, distribution and sale of natural gas. The number of workers of PU, that has construction, transportation and design-engineering structures operating within it, exceeds 11,000 people. Azerigaz PU is supplying gas to over 1.5 mln subscribers in all the regions of the country. An optimal mechanism, managing a well-developed gas distribution system including numerous technical-process facilities, has been created for ensuring gas supply to subscribers.

Based on SOCAR's broad-scale program for modernization of industry and setting of production in compliance with modern standards, Azerigaz PU is carrying out an intensive work over new projects.

О компании: Указом Президента Азербайджана от 1 июля 2009 года на базе ЗАО «Азеригаз» было создано ПО «Азеригаз» в составе Госнефтекомпании Азербайджана.

Производственное объединение осуществляет деятельность на территории Азербайджана в сфере приема, распределения и продажи природного газа. Численность работников ПО, в составе которого функционируют строительные, транспортные и проектно-конструкторские структуры, превышает 11 тыс. человек. ПО «Азеригаз» обеспечивает подачу природного газа свыше 1,5 млн. абонентам во всех регионах страны, для газообеспечения которых создан оптимальный механизм управления сложной газораспределительной системой, включающий многочисленные технико-технологические объекты.

В рамках широкой программы Госнефтекомпании Азербайджана по модернизации отрасли и организации производства в соответствии с современными требованиями, ПО «Азеригаз» ведется интенсивная работа над новыми проектами.

Complex Drilling Works Trust of SOCAR

Трест «Комплексные буровые работы» SOCAR

About the company: Complex Drilling Works Trust, the successor of the old and proud school of Azerbaijani drillmen, was established by the order of the Azerbaijan Republic President Ilham Aliyev in March 2007.

The Trust is a full-fledged member of the International Association of Drilling Contractors (IADC). Possessing a high-skilled staff of specialists and well-equipped production base meeting all latest standards, the Trust successfully performs all types of the industrial work.

The Trust's portfolio includes such projects as a discovery of Umid field, horizontal wells at West Absheron and Pirallakhy fields, a project on enlargement of underground gas storages and a commissioning of high-output, gas condensate wells at Bulla Deniz field. At present the Trust is preparing for the commencement of drilling works at new Caspian fields Karabakh and Bahar.

The level of the production professionalism and technological support makes the Trust the largest and the advanced national drilling organization of our Republic.

Address: Narimanov district, 105 Agha Neymatulla Street, Baku, AZ1033, Azerbaijan

Head of the Trust: Alish Hasanov

Управляющий: **Алиш Гасанов**

О компании: Указом президента Азербайджанской Республики Ильхама Алиева в марте 2007 года был основан Трест «Комплексных Буровых Работ», являющийся наследником старой и гордой школы азербайджанских буровиков.

Сегодня трест является действительным членом Международной ассоциации буровых подрядчиков(IADC).Обладая высококвалифицированным штатом специалистов и хорошо оснащенной производственной базой отвечающей всем последним стандартам, тресту удается успешно осуществлять все виды отраслевой деятельности.

В портфеле работ треста такие проекты, как открытие месторождения Умид, горизонтальные скважины на месторождении Западный Абшерон и Пираллахи, проект по расширению подземных газовых хранилищ и сдача в эксплуатацию высокодебитных, газоконденсатных скважин на месторождении Булла Дениз. В данный момент Трест готовится к началу бурения на новых месторождениях каспийской акватории Карабах и Бахар.

Уровень производственного профессионализма и технологического обеспечения делает ТКБР самой большой и передовой национальной буровой организацией нашей Республики.

SOCAR Marketing and Operations

Управление маркетинга и экономических операций SOCAR

About the company: SOCAR Marketing and Operations was established to ensure effective sale of oil and petroleum products in Azerbaijan and the global market in accordance with the interests of SOCAR.

SOCAR MO is also engaged in sale of hydrocarbons of operating companies functioning on basis of production sharing and joint venture agreements.

SOCAR MO seeks to carry out effective supply of oil and oil products to customers and tap new markets. Oil export is carried out via three pipelines: Baku-Tbilisi-Ceyhan, Baku-Supsa, Baku-Novorossiysk. Azeri Light oil produced at Azeri-Chirag-Gunashli fields is exported along the Baku-Tbilisi-Ceyhan and Baku-Supsa pipelines. Crude oil produced at SOCAR fields is exported along the Baku-Novorossiysk pipeline

SOCAR MO also exports motor gasoline, diesel fuel and jet fuel.

0 компании: Управление маркетинга и экономических операций создано с целью эффективной продажи нефти и нефтепродуктов в Азербайджане и на мировом рынке в соответствии с интересами SOCAR.

Управление также участвует в операциях продажи углеводородов операционных компаний, функционирующих на основании соглашений о разделе продукции и договоров о совместных предприятиях. УМЭО преследует цели эффективных поставок нефти и нефтепродуктов покупателям и освоения новых рынков. Экспорт нефти осуществляется по трем трубопроводам: Баку-Тбилиси-Джейхан, Баку-Супса, Баку-Новороссийск. По трубопроводам Баку-Тбилиси-Джейхан и Баку-Супса экспортируется нефть марки Azeri Light, добытая на месторождениях «Азери»-«Чыраг»-«Гюнешли». Сырая нефть, добытая с месторождений SOCAR, экспортируется по трубопроводу Баку-Новороссийск.

УМЭО SOCAR также осуществляет экспорт автомобильного бензина, дизельного топлива и топлива для реактивных двигателей.

SOCAR Polymer LLC

General Manager: Farid Jafarov

Генеральный директор: Фарид Джафаров

About the company: SOCAR Polymer LLC is a petrochemical company incorporated on 16 July 2013 to expedite the development of Azerbaijan's chemical industry. It was established on a Public-Private-Partnership basis with the involvement of SOCAR and private investors.

The company implemented a Project aimed at construction of two production facilities in the Sumgait Chemical Industrial Park, with the design capacity of 184 KTA of Polypropylene (PP) and 120 KTA of High-Density Polyethylene (HDPE). Attended by the President of Azerbaijan, the opening ceremony of the PP plant took place in July of 2018 and the HDPE plant was launched in 2019.

The production technology licensors of the plants are the world-known LyondellBasell and INEOS companies. PP and HDPE are used for production of high-pressure gas/sewage/water pipes, packaging, textiles, stationery, automotive components, electronic and electrical appliances, etc.

О компании: OOO «SOCAR Polymer» является нефтехимической компанией, учрежденной 16 июля 2013 года с целью ускорения развития химической промышленности Азербайджана. Компания была создана на основе государственно-частного партнерства, с привлечением SOCAR и частных инвесторов.

Компания реализовала проект по строительству на территории Сумгайытского химико-промышленного парка двух производственных объектов с проектной мощностью в 184 килотонн полипропилена и 120 кт полиэтилена высокой плотности (ПЭВП) в год. Церемония открытия Полипропиленового завода состоялась в участием Президента Азербайджана в июле 2018го года, а завод по производству ПЭВП был запущен в 2019 году.

Лицензиарами технологий производства выступили всемирно известные компании LyondellBasell и INEOS. Продукция заводов используется для производства газо- и водопроводных труб высокого давления, различных видов упаковки, текстиля, деталей и компонентов для автомобильной промышленности, электронных и электрических приборов и т. п.

Atena Group CJSC

AO3T «Atena Qrup»

About the company: Atena Group CJSC was established in November 1992. The Company entered a new stage of development within the framework of the State programme for the social and economic development of the regions of the Azerbaijan Republic launched in 2010. Such subsidiaries as ATENA LLC, ATENA AGRO LLC were established.

ATENA LLC is the most powerful milk processing enterprise built with the latest technology and processing about 250 tonnes of milk per day. All ATENA products undergo about 100 types of analyses, of which 98 apply to milk. There are 4 labs operating in the plant, accredited by the state and aimed at maintaining the milk quality.

ATENA is one of the active participants of the "Made in Azerbaijan" brand development and export mission of the country.

Along with its own development, ATENA Group CJSC is involved in social-economic development of the country and the region as a whole.

О компании: AO3T «Atena Qrup» создано в ноябре 1992 года. В рамках государственной программы социально-экономического развития регионов Азербайджанской Республики в 2010 году Компания вступила в новый этап развития. Были созданы такие дочерние предприятия, как ООО «ATENA» и ООО «ATENA AQRO».

OOO «ATENA» - самое мощное молокоперерабатывающее предприятие, построенное по самым последним технологиям, где перерабатывается около 250 тонн молока в сутки. Над всеми продуктами «ATENA» проводятся около 100 видов анализов, из которых 98 применяются только к молоку. На заводе действуют 4 аккредитованные государством лаборатории, нацеленные на обеспечение и поддержание качества молока.

«ATENA» является одним из активных участников развития бренда -«Made in Azerbaijan» и экспортной миссии страны.

Наряду с собственным развитием, AO3T «ATENA QRUP» участвует в социально-экономическом развитии страны и региона в целом.

Good Food, Good Life

Nestlé Azerbaijan LLC

ООО «Nestlé Азербайджан»

General Director:
Anar Mammadov

Генеральный директор: **Анар Маммедов**

About the company: Nestlé, the world's leading Health, Nutrition and Wellness Company, is committed to bringing good food and good life to consumers everywhere.

Nestlé's roots date back to 1866. In that year, Henri Nestlé, out of a desire to help address the high incidence of infant mortality, invented his Milk Food (Farine Lactée Nestlé), a milk-based infant cereal that was the world's first infant formula.

From those roots, Nestlé's product range has expanded to include over 8,000 different food products sold across five continents.

The Company's representative office - Nestlé Azerbaijan LLC was established on May, 2012.

Today, the company delivers the wide product range on the market of Azerbaijan: coffee and beverages, cocoa, culinary products, infant foods, chocolate products, breakfast cereals, pet foods and other products.

О компании: «Нестле» — крупнейшая в мире компания-производитель продуктов питания и напитков, эксперт в области правильного питания и здорового образа жизни. Кредо «Нестле» — делать жизнь лучше, предлагая потребителям только качественные и полноценные продукты.

История «Нестле» уходит корнями в 1866г. Именно в том году Генри Нестле, решив побороть детскую смертность, изобрел молочную смесь Farine Lactée и приступил к ее производству.

С тех пор ассортимент продукции «Нестле» постоянно расширяется и в настоящее время насчитывает свыше 8000 торговых марок продуктов питания, которые знают потребители на всех пяти континентах.

Представительство компании - OOO «Nestlé Азербайджан» - было открыто в мае 2012г.

Сегодня компания поставляет на рынок Азербайджана широкий ассортимент продукции: кофе и кофейные напитки, какао, кулинарные продукты, детское питание, шоколадные изделия, готовые завтраки и другие продукты.

Director of Lezzet Food Industry LLC

Teymur Rzaye

Директор ООО «Леззет Гила Сенайе:

Lezzet Food Industry LLC

ООО «Леззет Гида Сенайе»

About the company: Established in 1995, Lezzet Food Industry LLC in the early years was engaged only in import and wholesale selling of food products. Soon the Company set up its activity in the two main directions (wholesale of fast-moving consumer products and in the sector of foodstuff production) and overcame a long development path. Over the past period, the Company established trade relations with a number of foreign and local firms, thereby extending its distribution network.

Starting its activity from sugar production, processing and packing of agricultural products, the Company gained serious success in this area and established an enterprise for sugar production, processing and packing of agricultural products.

Lezzet Food Industry LLC is taking direct part in all the activities carried out to develop the economy, increase the competitiveness of the national economy and integration into the world economic system.

The achievements of the Company were highly assessed by the officials of the country and the Autonomous Republic.

Address: 2 N. Tusi Street, Nakhchivan city, AZ7000, Nakhchivan Autonomous Republic, the Republic of Azerbaijan Tel.: (+99436) 544 51 33, (+994 36) 550 82 24, (+994 36) 541 78 40 Fax: (+99436) 550 51 34, (+994 36) 550 82 25, (+994 36) 544 51 34

Теймур Рзаев О компании: Основанное в 1995 году ООО «Леззет Гида Сенайе» в первые годы занималось только импортом и оптовой продажей пишевых продуктов. а вскоре после этого построило свою деятельность в двух основных направлениях - оптовая продажа товаров повседневного спроса и производство пищевых продуктов - и прошло большой путь развития. За прошедший период времени компания установила торговые связи с рядом иностранных и местных фирм, расширив свою дистрибьюторскую сеть.

Начав свою деятельность с производства сахара, обработки и пакетирования сельскохозяйственной продукции, компания добилась серьезных успехов в этой области и учредила предприятие «Производство сахара, обработка и пакетирование сельскохозяйственной продукции». ООО «Леззет Гида Сенайе» принимает непосредственное участие в мероприятиях, осуществляемых с целью развития экономики, повышения конкурентоспособности национальной экономики и интеграции в мировую хозяйственную систему.

Успехи компании высоко оценены руководством страны и Автономной

"Sağlam Ailə" Medical Center

Медицинский центр "Sağlam Ailə"

About the company: Having started operating in 2003 under the motto "We are not a hospital, but a Center for Preventive Check-Up", "Sağlam Ailə" medical center, possessing ISO 9001:2008, ISO15189:2012 quality and accreditation certificates, is providing 6,000 diffeent laboratory examinations and ambulatory services. At present, the Center has five branches in Baku, Sumgayit and Khyrdalan, and provides services to people in 4 points of "ASAN XIDMƏT". In 2019, the Center will start providing services in Ganja. A fully computer-based system, reagents made in the USA and Europe, special quality control and online management system are enhancing trust of patients in the center. To extend the range of services provided, the Clinic is cooperating with internationally accredited laboratories. Laboratory innovations in the field of the world medicine are being applied in the Center. A dynamically developing center has earned many awards owing to the growing reputation and high quality services provided to patients.

О компании: Начав в 2003 году свою деятельность под лозунгом «Мы не больница, а центр профилактического обследования», Медицинский центр "Sağlam Ailə", обладающий сертификатом качества и аккредитации iSO 9001:2008, iSO 15189:2012, осуществляет более 6000 различных лабораторных обследований и поликлинических услуг. В настоящее время центр имеет 5 филиалов в Баку, Сумгайыте и Хырдалане и обслуживает население в 4 пунктах "ASAN XIDMOT". В 2019 году центр начанет предлагать свои услуги и в Гяндже. Полностью автоматизированная система, реагенты американского и европейского производства, особый контроль качества, электронная система управления, повышает доверие пациентов к центру. Для увеличения видов оказываемых услуг клиника сотрудничает с лабораториями, имеющими международную аккредитацию, в центре применяются лабораторные инновации в области мировой медицины. В результате растущего авторитета и оказываемых пациентам высококачественных услуг, динамично развивающийся центр удостоен многох наград.

TUFAN FC

Director: Ruslan Nasibov

About the company: Tufan is a long-term and unique football club project. So far, we are the only ones that introduce the sports science in Azerbaijan and the region through our activity. Our Club is not a private property but a public association. In the last 4 years our club has been regularly competing in the leagues held under the flag of AFFA, and in the coming season it will compete in the U-17 League and Young Players. League. We are now working hard over improving the performance of junior teams composed of players born in 2002-2005.

Address: MZ Plaza, 219 Ahmad Rajabli Street, Baku, AZ1075, Azerbaijan

TUFAN FC

Директор: Руслан Насибов

О компании: Туфан является долгосрочным и уникальным проектом футбольного клуба. Только мы в настоящее время в Азербайджане и регионе применяем в нашей деятельности спортивную науку. Наш клуб является не частной собственностью, а общественным объединением. За последние

четыре года Туфан регулярно участвовал в лигах, проводимых под флагом Ассоциации Футбольных Федераций Азербайджана (АФФА) и в предстоящем сезоне будет принимать участие в лиге U-17 и в Молодежной лиге. В настоящее время мы проводим интенсивную работу над усовершенствованием результативных показателей молодых игроков, рожденных в период с 2002 по 2005 года.
